

# QUARTERLY RETURN OF MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

## ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,  
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 169.] **Marriages**—October, November, December, 1890. [Price 9d.  
**Births and Deaths**—January, February, March, 1891.

General Register Office, Somerset House,  
30th April 1891.

The POPULATION of the UNITED KINGDOM in the middle of 1891 is estimated at 38,614,315 persons; that of England and Wales at 29,804,983, of Scotland at 4,164,490, and of Ireland at 4,644,842.

In the United Kingdom 289,891 *births* and 205,589 *deaths* were registered in the three months ending 31st March 1891. The natural increase of population was, therefore, 84,302. The registered number of persons married in the quarter ending 31st December 1890 was 155,556.

The birth-rate in the United Kingdom in the first quarter of 1891 was 30·4 and the death-rate 21·6 per 1000. The marriage-rate in the fourth quarter of 1890 was 16·1 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

### ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2122 registration sub-districts of England and Wales during the quarter ending 31st March 1891; and the MARRIAGES in 15,002 churches or chapels, in 10,553 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 31st December 1890.

#### Marriages.

During the three months ending with December last the marriages of 131,580 persons were registered in England and Wales, giving an annual rate of 17·8 per 1000 of the estimated population. This is the highest rate that has been recorded in any December quarter since 1883, and is 6·0 per cent. above the average rate in the six years 1884-89. In registration counties the rise in the marriage-rate last quarter, as compared with the December quarter of 1889, was 8·1 per cent. in Dorsetshire, 9·1 in the North Riding of Yorkshire, 9·8 in extra-metropolitan Middlesex, 12·2 in South Wales, 13·2 in Cheshire, 13·3 in Monmouthshire, 27·3 in Rutlandshire, and 30·5 in Huntingdonshire. Most of the

other counties showed an increase, though less marked, in the rate, while the only two which showed any notable decrease were the East Riding of Yorkshire, and Bedfordshire, in which the rates were 7·0 and 17·7 per cent. respectively below those in the December quarter of 1889. In Registration London the rate was exactly the same as in the corresponding quarter of the previous year.

### *Births.*

The births registered during the three months ending on 31st March numbered 229,953, and were in the proportion of 31·3 annually per 1000 living. This rate was slightly above the rates in the March quarters of 1889 and 1890, but was 5·1 per cent. below the average rate in the corresponding periods of the ten years 1881-90. The lowest rates in registration counties were 23·1 in Rutlandshire, 24·7 in North Wales, 25·0 in Sussex, 25·4 in Shropshire, 26·3 in Lincolnshire, 27·1 in extra-metropolitan Surrey, and 27·6 in Herefordshire; while the highest were 36·1 in Northumberland, 36·5 in South Wales, 37·1 in Essex, and 43·0 in Monmouthshire.

In the twenty-eight towns the birth-rate was 32·0 per 1000 living, and 0·7 above that in the whole country. The lowest rates were 23·2 in Huddersfield, 25·9 in Bradford, 26·3 in Brighton, and 26·7 in Nottingham, while the rates in the other great towns ranged upwards to 39·2 in Sunderland, 39·8 in Cardiff, and 41·7 in Newcastle-upon-Tyne. In fifty other large town districts the average birth-rate was 32·6 per 1000, or 0·6 per 1000 above the rate in the larger towns.

### *Excess of Births over Deaths, and Emigration.*

The natural increase of the population of England and Wales, or the excess of births over deaths, which had amounted to 73,790, 80,952, and 60,348 respectively in the March quarters of 1888, 1889, and 1890, was 71,854 last quarter.

It appears from returns issued by the Board of Trade that 50,290 emigrants (including 17,708 foreigners), embarked from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionately 832 whose nationality was not distinguished, the emigrants of British origin numbered 32,487, and of these 22,690 were English, 3459 Scotch, and 6338 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 761 from England, 831 from Scotland, and 1365 from Ireland. Each of the proportions shows a considerable decline when compared with the mean proportion in the preceding three years.

### *Prices and Pauperism.*

During the three months ending March last the average price of wheat was 32s. 11d. per quarter, the average prices in the preceding two quarters having been 34s. 4d. and 31s. 10d. The mean wholesale prices of beef and mutton were 5½d. and 7½d. per lb. respectively; the price of beef showed an increase of ½d. and that of mutton a decrease of ¾d. compared with the prices in the preceding quarter. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 19s. 5d. per ton, against 16s. 4d. and 19s. 4d. in the first quarters of the preceding two years. The mean price of 2¾l. per cent. Consols was 96l. 16s. 6d. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 6l. to 5l. on the 4th December, was further reduced on 8th January to 4l., on 22nd January to 3l. 10s., and on 29th January to 3l. The average minimum rate per cent. charged during the quarter was 3l. 7s.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 700,526, of whom 186,337 received in-door, and 514,189 out-door relief. The proportion of the population in receipt of pauper relief was 23·5 per 1000, against 27·3, 26·1, and 24·7 in the preceding three corresponding quarters.

### *Meteorology.*

Remarks upon the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The mean reading of the barometer was 29·962 inches, and was ·192 of an inch above the mean reading for the corresponding quarters of 50 years; the mean was above the average in January and February, the excess being nearly half an inch in the latter month, and below in March. The mean temperature of the air during the quarter was 37°·6, and was 1°·2 below the average for the corresponding quarters of 120 years. The monthly mean was 2°·6 below the average in January, 0°·3 in February, and 0°·8 in March.

The very cold weather which set in on 23rd November 1890 continued until nearly the end of January. On five days of the month the temperature was more than 12° below its average; the last week in the month was, however, fine and warm, and on four days the temperature was more than 7° above the average. In February the weather was fine and dry, but with frequent fog; the temperature was generally below the average from the 9th to the 26th, and above during the remainder of the month. The first week in March was warm, but the remainder of the month was cold and stormy, with frequent snow; on the 9th and 10th there was a heavy snowstorm, which was most severe in the South-western counties. At 29 stations of observation the mean temperature during the quarter ranged from 35°·9 at Wolverhampton, 36°·2 at Somerleyton, and 36°·4 at Rugby, to 41°·9 at Llanduddno and in Guernsey, and 43°·2 at Truro.

The amount of rain measured during the quarter at the Royal Observatory, Greenwich, was 3·75 ins., and was 1·22 ins. below the average amount in the corresponding periods of 76 years; the amount was below the average in January and February, but showed an excess in March. In January rain or snow fell on 17 days, in February on 4 days (the amount being only 0·05 of an inch against an average of 1·56 ins.), and in March on 17 days. The measured rainfall during the quarter at 30 stations of observation ranged from 2·04 inches at Liverpool, 2·31 at Leeds, and 2·72 at Carlisle, to 6·04 in Guernsey, 6·92 at Torquay, 7·52 at Truro, and 7·88 at Bath.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 190 hours, or 21·0 per cent. of the total number of hours the sun was above the horizon, the mean proportion in the corresponding periods of the preceding ten years having been 17·8 per cent. The amounts recorded in January and February showed a considerable excess, while that in March was below the average.

### *Deaths.*

During the three months ending with March 158,099 deaths were registered, being in the proportion of 21·5 deaths annually per 1000 persons living. This rate was 0·2 per 1000 higher than the average rate in the March quarters of the ten years 1881-90. The lowest rates in registration counties were 17·2 in Lincolnshire, 18·1 in Derbyshire, 18·7 in extra-metropolitan Middlesex, 18·8 in Rutlandshire and in Nottinghamshire, and 18·9 in extra-metropolitan Surrey, in extra-metropolitan Kent, and in the East Riding of Yorkshire; while the highest were 23·5 in Lancashire, 24·0 in South Wales, 26·7 in Monmouthshire, and 28·7 in Cornwall.

The 158,099 deaths included 80,427 of males, and 77,672 of females, the mean annual mortality of males being 22·5, and that of females 20·6, per 1000 estimated to be living of each sex; the rate among males was 0·1 per 1000 and that among females 0·2 per 1000 above the mean rate for each sex in the March quarter of the preceding ten years. Out of equal numbers living, the deaths of males were 109 to 100 of females, the mean proportion in the March quarters of the ten years 1881-90 having been 110.

**URBAN AND RURAL MORTALITY.**—In the registration districts and sub-districts, which are taken to represent approximately the urban portion of the country (*see* Table III.), and contain a population estimated at nearly nineteen and a half millions, the death-rate last quarter was 21·9 per 1000, while among the remaining and chiefly rural population of nearly ten and a half millions, it was 20·9 per 1000. The urban rate was 0·1 per 1000 below, while the rural rate was 0·7 per 1000 above, the average rates in the March quarters of the ten years 1881–90. Out of equal numbers living in these urban and rural portions of the country, the deaths last quarter in the urban to those in the rural were in the proportion of 105 to 100, the mean proportion in the March quarters of the ten years 1881–90 having been 109.

In the twenty-eight great towns (*see* Tables V. and VI.), with an aggregate population estimated to exceed ten millions, the annual death-rate last quarter was 23·0 per 1000, or 1·1 per 1000 above the general urban rate, and 0·1 per 1000 above the average rate in these towns in the March quarters of the preceding nine years. The lowest rates were 16·2 in Derby, 18·1 in Nottingham, 19·2 in Hull, 19·5 in Bradford, and 19·6 in Brighton; and the highest were 28·4 in Manchester, 28·6 in Blackburn, 29·7 in Halifax, and 30·8 in Preston. The rate in Registration London was 22·6.

In fifty other large town districts, with an estimated population of rather more than three millions, the death-rate last quarter was 21·6 per 1000, or 1·4 per 1000 below the rate in the larger towns, 0·3 per 1000 below the general urban rate, and 0·1 per 1000 above the general rate in England and Wales.

**MORTALITY AT DIFFERENT AGES.**—Of the 158,099 deaths registered last quarter, 33,580 were of infants under one year of age, 73,730 of persons aged between one and 60 years, and 50,789 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 146 deaths to 1000 births registered, exceeding by 3 per 1000 the mean proportion in the March quarters of the preceding ten years. The lowest proportions in registration counties were 107 in Westmorland, 111 in Dorset, 115 in extra-metropolitan Middlesex, 127 in Derbyshire and in the East Riding of Yorkshire, and 128 in extra-metropolitan Surrey and in Hampshire; while the highest were 163 in Warwickshire and in Monmouthshire, 166 in Buckinghamshire, and 191 in Cornwall. In the twenty-eight great towns the mean proportion was 149 per 1000, exceeding by only 3 per 1000 the general English rate; the proportions ranged upwards from 112 in Derby, 119 in Sunderland, 127 in Portsmouth, and 130 in Wolverhampton, to 196 in Preston, 210 in Oldham, 217 in Huddersfield, and 222 in Halifax.

In fifty other large town districts the infant mortality averaged 155 per 1000 births, and the proportions ranged from 99 in Dover, 108 in Warrington, 118 in Shrewsbury, and 119 in Burton-upon-Trent, to 191 in Newport (Monmouthshire) 193 in Middlesbrough, 215 in Gloucester, and 256 in Worcester.

The mortality of persons aged between one and 60 years in England and Wales was in the proportion of 11·2 deaths annually per 1000 of the estimated population at these ages, or 0·3 per 1000 below the average rate in the March quarters of the preceding ten years. In the twenty-eight great towns the rate was 13·4 per 1000; the lowest rates were 8·9 in Derby, 9·5 in Norwich, 9·7 in Nottingham, and 10·0 in Brighton, and the highest 17·5 in Halifax, and 18·3 in Manchester and in Blackburn.

Among persons aged 60 years and upwards the mortality in England and Wales was at the rate of 93·7 annually per 1000 persons living at these ages, and exceeded by 8·1 per 1000 the average rate in the March quarters of the ten years 1881–90. The rate was lower last quarter than in the March quarters of 1875, 1879, 1886, and 1890, but it was higher than in the corresponding period of any other of the preceding twenty-one years. In the twenty-eight great towns the mean rate at these ages was 102·8, the rates ranging from 82·9 in Leicester, 84·3 in Hull, 84·7 in Nottingham, and 86·4 in Derby, to 119·3 in Manchester, 124·9 in Cardiff, and 139·5 in Preston.

Compared with the respective average rates in the March quarters of the ten years 1881-90, the mortality of persons aged between one and 60 years last quarter in England and Wales was 2·6 per cent. below the average, while that of infants under one year showed an excess of 2·1 per cent., and that of persons aged 60 years and upwards an excess of 9·5 per cent.

**ZYMOTIC DISEASES.**—The 158,099 deaths from all causes included—

3684	attributed to measles,
3448	„ whooping-cough,
1410	„ scarlet fever,
1385	„ diarrhœa,
1323	„ diphtheria,
1267	„ fever,
5	„ small-pox.

Thus 12,522 deaths were ascribed to these zymotic diseases, corresponding to an annual rate of 1·70 per 1000 living, a rate 0·26 lower than the average in the first quarters of the ten years 1881-90. The rate from these diseases last quarter was slightly in excess of that in the first quarter of 1890, but it was lower than in the corresponding period of any other year on record. The rate was less than 1·00 per 1000 in Hertfordshire, Northamptonshire, Wiltshire, Dorsetshire, Herefordshire, Shropshire, Rutlandshire, Derbyshire, the East Riding of Yorkshire, and Westmorland, while it exceeded 2·00 in Cornwall, Somersetshire, Leicestershire, Lancashire, and the West Riding of Yorkshire, and reached 3·08 in Monmouthshire. In the twenty-eight great towns the rate was 2·16, varying from 0·78 in Derby, 0·90 in Wolverhampton, and 0·93 in Hull, to 3·07 in Leicester, 3·09 in Manchester, 3·53 in Bristol, 3·70 in Preston, 4·03 in Salford, 4·48 in Huddersfield, 4·64 in Halifax, and 5·10 in Blackburn. In fifty other considerable urban districts the rate was 1·80; while in the remaining and mainly rural parts of England and Wales it was 1·41.

The deaths from *measles* numbered 3684, and corresponded to an annual rate of 0·50 per 1000. This rate was in excess of the average rate in the first quarters of the ten years 1881-90, which was 0·43. No death from this disease was registered in Dorsetshire or Herefordshire, and the rate did not exceed 0·10 per 1000 in Hertfordshire, Huntingdonshire, Worcestershire, or Warwickshire, while it reached 1·04 in the West Riding of Yorkshire, 1·29 in Somersetshire, and 1·53 in Monmouthshire. In the twenty-eight great towns the rate was 0·72 per 1000, varying, however, from 0·07 in Birmingham, 0·08 in Derby, 0·14 in Sunderland, and 0·15 in Newcastle-upon-Tyne, to 2·13 in Portsmouth, 2·66 in Bristol, 2·89 in Huddersfield, and 4·08 in Blackburn. In fifty other considerable urban districts the rate was 0·48, while in the remaining and mainly rural parts of the country it was 0·37. Among sub-districts, the mortality from measles was apparently excessive in Worthing, Basingstoke, Prittlewell, Walcot, Thornbury, Walsall, Rothley, Eckington, Aspull, Westleigh, Atherton, Tonge-with-Haulgh, Radcliffe, Pilkington, Whitworth, Barnsley, Worsbrough, Thornaby, Tredegar, Newport (Monmouthshire), and Ogmores.

The 3448 deaths from *whooping-cough* corresponded to an annual rate of 0·47 per 1000, this rate being below the average in the next preceding ten first quarters, which had been 0·55. In registration counties the rates ranged from 0·03 in Wiltshire, 0·05 in Dorsetshire, 0·06 in Westmorland, and 0·07 in Herefordshire, to 0·77 in Leicestershire, 0·78 in Buckinghamshire, 0·84 in Warwickshire, and 1·60 in Cornwall. In the twenty-eight great towns the rate was 0·65; but while no death from the disease was registered in Wolverhampton, and the rate was only 0·02 in Hull, it was 1·14 in Leicester, 1·19 in Birmingham and in Huddersfield, 1·50 in Salford, and 1·64 in Halifax. In fifty other considerable urban districts the rate was 0·43, while in the remaining and mainly rural parts

of the country it was 0.27. Among sub-districts the mortality from whooping-cough was excessive in Hampton, Hoo, Ramsgate, Phillack, Uny-Lelant, Penzance, Huntley, Runcorn, Wigan, Worsley, and Lanchester.

The 1410 deaths from *scarlet fever* corresponded to an annual rate of 0.19 per 1000, a rate far below the rate for the ten preceding first quarters, which was 0.33. No death from this disease was recorded in Bedfordshire, and the rate was only 0.01 in Berkshire and in Northamptonshire, and 0.02 in Hertfordshire, in Wiltshire, and in Worcestershire; while the highest rates were 0.31 in Staffordshire, 0.33 in Lancashire and in the West Riding of Yorkshire, 0.39 in Cumberland, 0.42 in Monmouthshire, and 0.47 in South Wales. In the twenty-eight great towns the rate was 0.22; but while there was no death from scarlet fever in Brighton, and the rate did not exceed 0.03 in Cardiff, 0.04 in Norwich, and 0.07 in Birkenhead and in Hull, it reached 0.53 in Sheffield, 0.68 in Halifax, and 0.78 in Bradford. In fifty other considerable urban districts the rate was 0.27, while in the remaining and mainly rural parts of the country it was 0.16. Among sub-districts the mortality from scarlet fever was apparently excessive in Tunstall, Lichfield, Sutton Coldfield, Wigston, Lathom, Westleigh, Atherton, Ecclesfield, Kimberworth, Tredegar, Ystradyfodwg, Margam, Begelly, Roose, Tregynon, and Bryngwran.

The 1385 deaths from *diarrhœa* corresponded to an annual rate of 0.19 per 1000, a rate slightly below the average in the ten next preceding first quarters, which had been 0.21. The rate did not exceed 0.10 in Kent, Buckinghamshire, Huntingdonshire, Herefordshire, Rutlandshire, Northumberland, or North Wales, but reached 0.34 in Staffordshire, 0.36 in Warwickshire, and 0.53 in South Wales. In the twenty-eight great towns the rate was 0.19, rising, however, to 0.41 in Bolton, in Blackburn, and in Preston. In fifty other considerable urban districts the rate was 0.26, while in the remaining and mainly rural parts of the country it was 0.18.

The deaths ascribed to *diphtheria* were 1323, and corresponded to an annual rate of 0.18 per 1000 living, against an average of 0.16 in the ten next preceding first quarters. No death from the disease was registered in Westmorland, and the rate did not exceed 0.03 in Northamptonshire, Staffordshire, or the East Riding of Yorkshire, while it ranged upwards to 0.33 in Essex, 0.36 in Rutlandshire, and 0.47 in Monmouthshire. In the twenty-eight great towns the rate was 0.22, but while no death from the disease was registered in Blackburn, and the rate was only 0.02 in Hull, it was as high as 0.32 in London, in Manchester, and in Newcastle-on-Tyne, 0.42 in Norwich, and 0.43 in Salford. In fifty other considerable urban districts the rate was 0.12, while in the remaining and mainly rural parts of the country it was 0.16. Among sub-districts the mortality from diphtheria was excessive in Eastbourne, Hailsham, Ilford, Thorpe, Llansilin, Oswestry, Bingham, Eckington, Hyde, Hazelgrove, Heywood, Blackley, Fleetwood, Scarborough, and Tredegar.

The 1267 deaths from *fever*, including typhus, enteric fever, and simple or ill-defined forms of continued fever, corresponded to an annual rate of 0.17 per 1000 living, against an average of 0.22 in the ten next preceding first quarters. No death from fever was registered in Bedfordshire or Rutlandshire, and the rate was only 0.02 in Hertfordshire, Oxfordshire, Wiltshire, and Dorsetshire, while it was 0.41 in Durham, and 0.64 in the North Riding of Yorkshire. In the twenty-eight great towns the rate was 0.16, ranging from 0.03 in Brighton and 0.04 in Derby, to 0.37 in Birkenhead, 0.38 in Manchester, and 0.39 in Halifax. In fifty other considerable urban districts the rate was 0.24, while in the remaining and mainly rural parts of the country it was 0.17. Among sub-districts the mortality from "fever" was apparently in excess in Rothwell, Foleshill, Prescot, Atherton, Batley, Middlesbrough, Thornaby, Darlington, and Stockton.

Only 5 deaths were ascribed to *small-pox*, and of these 2 occurred in Harwich sub-district, one in Colchester Second Ward sub-district, one in the Metropolitan Asylum Hospital at Deptford, and one in the hospital ship "Atlas," moored off Dartford.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in fifty other considerable urban districts, and in the remainder of the country :—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the First Quarter of 1891.

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.	9.
England and Wales -	21.5	1.70	0.00	0.50	0.19	0.18	0.47	0.17	0.19
28 Great Towns -	23.0	2.16	0.00	0.72	0.22	0.22	0.65	0.16	0.19
50 other Town Districts	21.6	1.80	0.00	0.48	0.27	0.12	0.43	0.24	0.26
England and Wales, } less the 78 Towns - }	20.6	1.41	0.00	0.37	0.16	0.16	0.37	0.17	0.18

**CERTIFICATION OF CAUSES OF DEATH.**—Of the 158,099 deaths in England and Wales, the causes of 144,754, or 91.6 per cent., were duly certified by registered medical practitioners, and of 8751, or 5.5 per cent., by coroners after inquest. The causes of the remaining 4594, or 2.9 per cent., of the deaths were not certified. While, however, the proportion of uncertified deaths was only 0.7 in Monmouthshire, 0.8 in extra-metropolitan Middlesex, 1.1 in London, 1.2 in extra-metropolitan Surrey, and 1.3 in Wiltshire, it ranged in the other counties to 4.6 in Derbyshire, 4.7 in Dorsetshire, 6.2 in Herefordshire, and 7.2 in Huntingdonshire. The proportion of uncertified deaths was 6.4 per cent. in North Wales and 5.1 in South Wales. In the twenty-eight great towns the proportion was 2.1 per cent., varying from 0.6 in Plymouth and in Birkenhead, 0.7 in Norwich, and 0.8 in Sunderland, to 4.8 in Huddersfield and in Sheffield, 5.0 in Halifax, and 6.1 in Liverpool.

**VIOLENT DEATHS.**—To different forms of violence 4659 deaths were referred, showing an annual rate of 0.63 per 1000 living, against an average rate of 0.64 per 1000 in the first quarters of the next preceding ten years. No death from violence was registered in Rutlandshire, and the rates in other counties ranged from 0.29 per 1000 in Dorsetshire, 0.34 in Huntingdonshire, and 0.36 in Oxfordshire and in Bedfordshire, to 0.76 in Cornwall, 0.77 in Leicestershire, 0.82 in South Wales, and 0.84 in Cumberland. In the twenty-eight great towns the rate was 0.75 per 1000, ranging from 0.41 in Bradford, 0.43 in Nottingham, and 0.45 in Brighton and in Oldham, to 1.07 in Liverpool, 1.14 in Manchester, and 1.22 in Cardiff.

**INQUESTS.**—Inquests were held concerning 8751, or 5.5 per cent. of the total, deaths, against a mean proportion of 5.3 per cent. in the next preceding ten first quarters. In the twenty-eight great towns the proportion of inquests to total deaths was 6.7 per cent., and ranged from 1.8 in Halifax, 3.0 in Huddersfield, and 3.6 in Preston, to 8.1 in Bolton, 8.2 in Manchester, and 8.7 in Sunderland and in Cardiff.

**DEATHS IN PUBLIC INSTITUTIONS.**—Of the total deaths registered in England and Wales, 19,234, or 12.2 per cent., occurred in workhouses, hospitals, and public lunatic asylums, against a mean proportion of 11.1 per cent. in the first quarters of the next preceding ten years. In the twenty-eight great towns the proportion of deaths in such institutions was 19.1 per cent., and ranged from 7.0 in Huddersfield, 8.6 in Preston, and 9.3 in Plymouth, to 21.1 in Manchester and 25.6 in London.

## HEALTH OF COLONIAL AND FOREIGN CITIES.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in thirty Colonial and Foreign cities, with an aggregate population exceeding seventeen millions, corresponded to an annual rate of 26·5 per 1000 living.

In the twenty-one European cities the mean death-rate per 1000 was 26·1, against 23·0 in the twenty-eight great English towns. In Paris the rate was 27·6 per 1000, in Berlin 20·1, and in Vienna 26·4, the rate in London being 22·6. Among the thirty Colonial and Foreign cities the lowest death-rates were 18·5 in Dresden, 19·8 in Christiania, 20·1 in Berlin, and 20·9 in Philadelphia, while the highest were 36·5 in Madras, 37·3 in Calcutta, 41·3 in Alexandria, and 42·8 in Cairo. *Small-pox* caused 148 deaths in Brussels, 109 in Vienna, 71 in St. Petersburg, 25 in Prague, 22 in Bombay, 22 in Madras, and 21 in Paris. *Measles* showed the highest proportional fatality in Calcutta, Bombay, Madras, Paris, Brussels, Amsterdam, Stockholm, Rome, Venice, and New York; *scarlet fever* in Stockholm, Christiania, St. Petersburg, Breslau, New York, and Brooklyn; *diphtheria* in Paris, Copenhagen, Stockholm, Christiania, Berlin, Breslau, Munich, Buda-Pesth, Rome, Venice, New York, and Brooklyn; and *whooping cough* in Amsterdam. The death-rate from "fever" was excessive in the Indian and Egyptian cities, and in St. Petersburg, Rome, and Philadelphia. The mortality from *diarrhoeal diseases* showed the largest excess in the Indian cities, and in St. Petersburg, Berlin, Breslau, Munich, Cairo, and Alexandria. Under this heading were included 798 deaths from cholera in Calcutta, 19 in Madras, and 6 in Bombay.

## PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1881-91**, and in each Quarter of those Years.

\* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

\* The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore more or less from the boundaries of Geographical Counties.  
 † The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties. ‡ See page 14, not in the foot notes.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and Deaths under one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES; TYPHOUS FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and DEATHS in REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION DISTRICTS of ENGLAND.

\* The Registration Districts, 632 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are not arranged topographically under the Registration Counties.  
 † These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by fresh-water or tidal water of rivers and creeks. See page 14, note b.

NOTE.—The present number of Registration districts is 632. The above numerical arrangement, 1 to 630, was adopted on 1st January 1881. Since that date two new Registration Districts have been formed, the District of Kensington (1) having been divided into Farringdon (1a) and Kensington (1b), and the District of Anglesey (629) into Anglesey (630a) and Holyhead (630b).

## I.—LONDON.—REGISTRATION SUB-DISTRICTS.

a The Registration Sub-districts (2122 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; H indicates Hospital or Infirmary; and L Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 4th April 1891.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

\* 630b: 1.—The 6 deaths from scarlet fever occurred in Aberffraw parish.

## METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING MARCH 31ST, 1891.

By JAMES GLAISHER, ESQ., F.R.S., &amp;c.

The weather in January was dry and very cold, with frequent fog and snow. It was a continuation of the very cold weather which set in on November 25th, and thus continued for 59 days. At Blackheath the mean temperature of many days was below the average by more than  $10^{\circ}$ , on the 10th the deficiency amounted to  $18\frac{3}{4}^{\circ}$ , and on the 11th to nearly  $15^{\circ}$ ; the temperature of the 17th, 18th, and 19th was more than  $12^{\circ}$  below the average. It was warm and above its average from the 23rd to the end of the month, being particularly mild and warm on the 24th, 28th, 29th, and 31st days, when it was  $9^{\circ}\cdot 3$ ,  $7^{\circ}\cdot 3$ ,  $7^{\circ}\cdot 5$ , and  $7^{\circ}$  respectively above its average. The atmospheric pressure was above its average till the 19th, particularly so from the 10th to the 15th, the mean daily excess for these 6 days being  $0\cdot 68$  in., then below from the 20th to the 24th, and above again from the 25th to the end of the month. The fall of rain was a little below its average, and vegetation was backward.

The weather in February was fine and dry, but with frequent fog. Snow fell at a few places on the 14th. The temperature of the air was generally above its average till the 8th, generally below from the 9th to the 26th, and above its average again on the 27th and 28th. The atmospheric pressure was above its average throughout the month, with the exception of the 26th, when it was  $0\cdot 01$  in. below; on several days varying from  $\frac{1}{2}$  an inch to  $\frac{3}{4}$  of an inch above its average. The fall of rain was exceedingly small all over the country; no rain fell at Oxford, and at several stations only  $0\cdot 01$  in. fell; at the Royal Observatory, Greenwich, only  $0\cdot 050$  in. fell, and there are only four instances of as small or smaller fall of rain in the month of February back to 1815, viz. :—

1870 it was $0\cdot 054$ in.	1834 it was $0\cdot 040$ in.
1857 „ $0\cdot 020$ in.	1821 „ $0\cdot 004$ in.

The weather in March was warm and pleasant during the first week, and the remainder of the month was cold and stormy, with frequent snow. The temperature of the air was above its average till the 7th, and below it from the 8th. The atmospheric pressure was above its average till the 5th, and was below it from the 6th. There was a heavy snowstorm on the 9th and 10th, accompanied by a gale of wind. The snow was general, but was particularly heavy on the southern parts of England. The snow was deeper in Cornwall and Devonshire than elsewhere, in these counties many railway trains were blocked for several days, notwithstanding the labour of several hundreds of men. Plymouth suffered very severely both from snow and wind. Vegetation at the end of the month was very backward.

About London, the mean daily temperature of the air was below its average till the 22nd day of January, being particularly so on the 10th, when it was as much as  $18^{\circ}\cdot 7$  below, and on several other days the temperature varied from  $9^{\circ}$  to nearly  $15^{\circ}$  below its average; the mean daily deficiency for the 22 days ending January 22nd being  $7^{\circ}\cdot 9$ ; from January 23rd to February 8th it was warm and generally above its average, the mean daily excess for the 16 days being  $3^{\circ}\cdot 9$ ; from February 9th to the 26th it was generally below, the mean daily deficiency for the 18 days being  $2^{\circ}\cdot 8$ ; from February 27th to March 7th it was warm and above its average, being particularly so the 2nd and 5th of March, when it was  $11^{\circ}$  and  $8^{\circ}\cdot 5$  respectively above, the mean daily excess for the 9 days being  $4^{\circ}\cdot 4$ ; and from March 8th to the 31st it was below, being on the 10th and 12th as much as  $10^{\circ}\cdot 1$  and  $11^{\circ}\cdot 4$  respectively, and on several other days it was as much as  $7^{\circ}$  below, the mean daily deficiency for the 24 days being  $4^{\circ}\cdot 3$ .

The mean temperature of the air for January was  $34^{\circ}\cdot 1$ , being  $2^{\circ}\cdot 6$  and  $4^{\circ}\cdot 3$  below the average of 120 and 50 years respectively; it was  $9^{\circ}\cdot 3$ ,  $3^{\circ}\cdot 0$ , and  $3^{\circ}\cdot 7$  lower than in 1890, 1889, and 1888 respectively.

The mean temperature of the air for February was  $38^{\circ}\cdot 5$ , being  $0^{\circ}\cdot 3$  and  $0^{\circ}\cdot 9$  below the average of 120 and 50 years respectively. It was  $1^{\circ}\cdot 0$ ,  $1^{\circ}\cdot 5$ , and  $3^{\circ}\cdot 5$  higher than in 1890, 1889, and 1888 respectively.

The mean temperature of the air for March was  $40^{\circ}\cdot 3$ , being  $0^{\circ}\cdot 8$  and  $1^{\circ}\cdot 2$  below the average of 120 and 50 years respectively. It was  $2^{\circ}\cdot 9$  and  $0^{\circ}\cdot 3$  lower than in 1890 and 1889 respectively, and  $2\cdot 3$  higher than in 1888.

The mean high day temperature of the air for January was  $38^{\circ}\cdot 7$ , being  $4^{\circ}\cdot 2$  below the average of 50 years; it was  $9^{\circ}\cdot 8$ ,  $2^{\circ}\cdot 8$ , and  $2^{\circ}\cdot 9$  lower than in 1890, 1889, and 1888 respectively; and there were only five instances of as low or lower maximum temperature back to the year 1841. viz. :—

1881 it was $36^{\circ}\cdot 1$	1871 it was $37^{\circ}\cdot 4$	1848 it was $38^{\circ}\cdot 1$
1880 „ $37^{\circ}\cdot 7$	1850 „ $38^{\circ}\cdot 0$	1842 „ $36^{\circ}\cdot 6$
1879 „ $35^{\circ}\cdot 1$		

The mean high day temperature of the air for February was  $46^{\circ}\cdot 3$ , being  $1^{\circ}\cdot 0$  above the average of 50 years; it was  $3^{\circ}\cdot 3$ ,  $3^{\circ}\cdot 3$ , and  $7^{\circ}\cdot 0$  higher than in 1890, 1889, and 1888 respectively.

The mean high day temperature of the air for March was  $47^{\circ}\cdot 7$ , being  $2^{\circ}\cdot 0$  below the average of 50 years; it was  $3^{\circ}\cdot 8$  and  $1^{\circ}\cdot 0$  lower than in 1890 and 1889 respectively, and  $3^{\circ}\cdot 3$  higher than in 1888.

The mean low night temperature of the air for January was  $29^{\circ}\cdot 1$ , being  $4^{\circ}\cdot 7$  below the average of 50 years; it was  $9^{\circ}\cdot 1$ ,  $3^{\circ}\cdot 1$ , and  $4^{\circ}\cdot 5$  lower than in 1890, 1889, and 1888 respectively; and there are only six instances of as low or lower minimum temperature back to the year 1841, viz. :—

1881 it was $27^{\circ}\cdot 3$	1879 it was $28^{\circ}\cdot 0$	1861 it was $28^{\circ}\cdot 7$
1880 „ $28^{\circ}\cdot 1$	1867 „ $28^{\circ}\cdot 5$	1841 „ $28^{\circ}\cdot 4$

The mean low night temperature of the air for February was  $31^{\circ}\cdot 8$ , being  $2^{\circ}\cdot 5$  below the average of 50 years; it was  $1^{\circ}\cdot 1$  lower than in 1890,  $0^{\circ}\cdot 1$  and  $1^{\circ}\cdot 0$  higher than in 1889 and 1888 respectively.

The mean low night temperature of the air for March was  $34^{\circ}\cdot 3$ , being  $0^{\circ}\cdot 7$  below the average of 50 years; it was  $1^{\circ}\cdot 5$  lower than in 1890, and  $0^{\circ}\cdot 9$  and  $1^{\circ}\cdot 3$  higher than in 1889 and 1888 respectively.

The mean daily range for January was  $9^{\circ}\cdot 6$ , being  $0^{\circ}\cdot 1$  larger than the average; in February it was  $14^{\circ}\cdot 5$ , being  $5^{\circ}\cdot 5$  larger than the average; and in March it was  $13^{\circ}\cdot 4$ , being  $1^{\circ}\cdot 3$  smaller than the average.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (-) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows :—

Direction of Wind.	JANUARY.			FEBRUARY.			MARCH.		
	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	4	1½	+ 2½	2	2½	- ½	6	3	+ 3
N.	4	3½	+ ½	2	3	- 1	3	4	- 1
N.E.	5	3½	+ ½	10	4	+ 6	8	4	+ 4
E.	2	3½	+ ½	2	2	+ 0	1	3	- 2
S.E.	3	3½	- ½	2	1½	+ ½	1	2½	- 1½
S.	5	4½	+ ½	1	3	- 2	3	5	- 2
S.W.	6	9½	- 3½	8	9	- 1	6	3½	+ 2½
W.	2	4½	- 2½	1	3	- 2	3	3½	- ½

The sign (+) denotes excesses over averages; the numbers affected by this sign in January are N.W., N.E., and E.; in February are N.E. and S.E.; and in March are N.W. and N.E.

The sign (-) denotes deficiencies below averages. In January this sign is opposite to S.W. and W., in February to S. and W.; and in March to S.W., S.E., and N.

The mean temperature of the air for January was  $4^{\circ}3$  warmer than in December; in February it was  $4^{\circ}4$  warmer than in January; and in March it was  $1^{\circ}8$  warmer than in February.

(From the preceding 50 years' observations the decrease from December to January is  $1^{\circ}4$  the increase from January to February is  $1^{\circ}0$ , and the increase from February to March is  $2^{\circ}1$ .)

From December to January there was an increase at all stations; at those south of  $51^{\circ}$  of  $2^{\circ}5$ ; between  $51^{\circ}$  and  $52^{\circ}$  of  $4^{\circ}0$ ; and at stations north of this parallel of  $2^{\circ}8$ .

From January to February there was an increase at all stations; at those south of  $51^{\circ}$  of  $2^{\circ}9$ ; between  $51^{\circ}$  and  $52^{\circ}$  of  $4^{\circ}7$ ; between  $52^{\circ}$  and  $53^{\circ}$  of  $6^{\circ}4$ ; and at stations north of this parallel of  $4^{\circ}6$ .

From February to March there was a decrease at stations south of  $51^{\circ}$  of  $1^{\circ}2$ ; between  $51^{\circ}$  and  $52^{\circ}$  there was an increase of  $1^{\circ}0$ ; between  $52^{\circ}$  and  $53^{\circ}$  an increase of  $0^{\circ}3$ ; and at stations north of this parallel a decrease of  $1^{\circ}9$ .

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of January was 29.961 ins., being  $0^{\circ}200$  in. above the average of 50 years. It was  $0^{\circ}201$  in. higher than in 1890, and  $0^{\circ}029$  in. and  $0^{\circ}092$  in. lower than in 1889 and 1888 respectively; and there were only 10 instances of as high or higher mean barometer reading back to the year 1841, viz. :—

ins.		ins.		ins.
1889 it was 29.990		1878 it was 29.979		1861 it was 30.011
1888 „ 30.053		1876 „ 30.095		1859 „ 30.037
1882 „ 30.185		1864 „ 30.044		1855 „ 29.998
1880 „ 30.204				

The mean reading of the barometer for February was 30.282 ins., being  $0^{\circ}483$  in. above the average of 50 years. It was  $0^{\circ}266$  in.,  $0^{\circ}564$  in., and  $0^{\circ}505$  in. higher than in 1890, 1889, and 1888 respectively, and there has been no instance of so high a mean reading back to the year 1841.

The mean reading of the barometer for March was 29.642 ins., being  $0^{\circ}107$  in. below the average of 50 years. It was  $0^{\circ}023$  in. and  $0^{\circ}162$  in. lower than in 1890 and 1889 respectively, and  $0^{\circ}210$  in. higher than in 1888.

From December to January there was an increase of atmospheric pressure at all stations, at those south of  $51^{\circ}$  of  $0^{\circ}19$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0^{\circ}12$ ; between  $52^{\circ}$  and  $53^{\circ}$  of  $0^{\circ}06$  in.; and at stations north of this parallel there was no change.

From January to February there was an increase at all stations, at those south of  $51^{\circ}$  of  $0^{\circ}28$  in., and at stations north of this parallel of  $0^{\circ}33$  in.

From February to March there was a decrease at all stations, at those south of  $51^{\circ}$  of  $0^{\circ}60$  in., and at stations north of this parallel of about  $0^{\circ}63$  in.

About London the atmospheric pressure was above its average till January 19th, being particularly so from the 10th to the 15th, the mean daily excess for these six days being  $0^{\circ}68$  in.; the mean daily excess for the 19 days being  $0^{\circ}41$  in.; from January 20th to the 24th it was below, the mean daily deficiency being  $0^{\circ}32$  in.; from January 25th to March 5th it was generally above, being particularly so from the 2nd to the 7th, and 13th to the 19th of February, the mean daily excess for these 13 days being  $0^{\circ}61$  in., the mean daily excess for the 40 days ending March 5th was  $0^{\circ}36$  in.; and from March 6th to the 31st it was below the mean daily deficiency, being  $0^{\circ}28$  in.

Thunderstorms occurred in January on the 30th at Salisbury; and on the 31st at Whitechurch.

In March on the 26th at Osborne, Blackheath, Royal Observatory, Oxford, Halifax, and Stonyhurst.

Thunder was heard but lightning was not seen in January on the 22nd at Halifax.

In February on the 12th at Somerleyton.

In March on the 13th at Somerleyton; on the 25th at Halifax; and on the 26th at Osborne and Somerleyton.

Lightning was seen but thunder was not heard in January on the 24th at Halifax.

Solar halos were seen in January on the 4th at Torquay; on the 8th at Torquay and Oxford; on the 19th and 27th at Torquay; and on the 31st at Liverpool.

In February on the 12th at Liverpool; and on the 27th at Torquay.

In March on the 6th at Oxford; on the 9th at Halifax; on the 13th at Torquay and Oxford; on the 17th and 19th at Torquay; on the 23rd at Oxford; on the 24th at Oxford and Liverpool; on the 25th at Liverpool; and on the 28th at Liverpool and Halifax.

Lunar halos were seen in January on the 18th at Torquay and Liverpool; on the 19th at Torquay; on the 20th at Torquay; on the 21st at Hull; on the 22nd and 24th at Liverpool; on the 25th at Torquay; and on the 27th at Liverpool and Halifax.

In February on the 21st at Liverpool.

In March on the 16th at Oxford; and on the 18th and 23rd at Liverpool.

*Snow fell* in January on the 1st at Hereford; on the 2nd at Bath; on the 4th at Royston, Somerleyton, and in the Northern Counties; on the 5th at Blackheath, Royal Observatory, and in the Midland Counties; on the 6th at Guernsey, and in the Midland Counties; on the 7th at Guernsey, Whitechurch, Royston, Cambridge, Lowestoft, Somerleyton, Llandudno, and Hull; on the 8th at Guernsey, Torquay, and in the Midland and Northern Counties; on the 9th at Torquay, Oxford, Salisbury, Oxford, and Hereford; on the 14th at Lowestoft, Somerleyton, and Hull; on the 15th, 16th, and 17th it was a general fall throughout the country; on the 18th at Royston, Lowestoft, and Somerleyton; on the 19th at Torquay, and in the Midland and Northern Counties; on the 20th at Royston, Halifax, and Carlisle; on the 21st at Rugby, Lowestoft, Somerleyton, and in the Northern Counties; and on the 22nd at Royston, Rugby, Lowestoft, Halifax, and Stonyhurst.

In February on the 14th at Whitechurch, Blackheath, Royal Observatory, Royston, and Cambridge.

In March on the 2nd at Carlisle; on the 3rd at Royston, Leeds, and Stonyhurst; on the 7th at Halifax, Hull, and Carlisle; on the 8th at Torquay, Bath, Royston, and in the Northern Counties; on the 9th and 10th there was a great snow storm, with strong wind, the drifts in many places in the South of England were to the depth of 10 to 12 feet; on the 12th at Truro, Plymouth, Torquay, Osborne, and Bath; on the 13th at Torquay, Bath, and Halifax; on the 14th at Oxford, Rugby, Wolverhampton, Halifax, Leeds, and Stonyhurst; on the 15th at Torquay, Bath, Oxford, and Stonyhurst; on the 19th at Blackheath, Royal Observatory, Royston, Cambridge, Somerleyton, Halifax, and Hull; on the 20th at Torquay, and in the Midland and Northern Counties; on the 21st at Torquay, Bath, Blackheath, Royal Observatory, Oxford, Royston, Cambridge, Rugby, and Halifax; on the 22nd at Guernsey, Torquay, Bath, and Hereford; on the 23rd at Royston, Cambridge, and Halifax; on the 25th at Wolverhampton and Carlisle; on the 26th at Plymouth, Torquay, and in the Midland and Northern Counties; on the 27th at Torquay, Bath, Oxford, Royston, and in the Northern Counties; on the 28th at Hull; on the 29th at Royston, Cambridge, Halifax, and Hull; and on the 30th at Bath, Whitechurch, Royston, Hereford, Cambridge, Rugby, Somerleyton, Wolverhampton, Halifax, and Hull.

*Hail fell* in January on the 4th at Lowestoft and Halifax; on the 14th at Lowestoft; on the 16th at Lowestoft and Hull; on the 17th at Hull; on the 20th at Oxford; on the 21st at Liverpool and Halifax; on the 22nd at Halifax; on the 24th and 29th at Truro; and on the 31st at Royston.

In March on the 2nd at Stonyhurst and Carlisle; on the 3rd at Rugby and Carlisle; on the 7th at Oxford and Liverpool; on the 8th at Liverpool and Stonyhurst; on the 10th at Torquay, Blackheath, Royal Observatory, and Hull; on the 11th and 12th at Hull; on the 14th at Plymouth and Hereford; on the 16th at Halifax; on the 19th at Royston, Rugby, and Hull; on the 20th at Blackheath, Royal Observatory, Rugby, and Hull; on the 21st at Royston; on the 23rd at Stonyhurst; on the 25th at Guernsey, Halifax, and Carlisle; on the 26th at Guernsey, Torquay, and in the Midland and Northern Counties; on the 27th at Guernsey, Royston, Rugby, Liverpool, and Stonyhurst; on the 28th at Torquay and Hull; on the 29th at Royston, Cambridge, Hull, and Leeds; and on the 30th at Torquay, Osborne, Royston, and Hull.

*Fog prevailed* in January on the 1st at Torquay, Bath, Oxford, and Rugby; on the 2nd and 3rd at Truro, Torquay, and in the Midland and Northern Counties; on the 4th at Blackheath, Royal Observatory, Oxford, Rugby, and Somerleyton; on the 7th and 9th at Oxford; on the 10th at Oxford and Somerleyton; on the 11th at Blackheath, Royal Observatory, Oxford, Cambridge, Lowestoft, and Somerleyton; on the 12th at Somerleyton and Stonyhurst; on the 13th at Torquay and in the Midland Counties; on the 20th at Wolverhampton; on the 22nd at Torquay; on the 23rd at Bath and Lowestoft; on the 26th at Lowestoft; on the 27th at Torquay, Bath, and Oxford; on the 28th at Torquay and Lowestoft; and on the 29th at Hull and Stonyhurst.

In February on the 2nd at Plymouth; on the 3rd at Plymouth and Somerleyton; on the 4th at Plymouth, Bath, Stonyhurst, and Carlisle; on the 5th at Plymouth, Bath, and Oxford; on the 6th at Plymouth, Bath, Oxford, and Somerleyton; on the 7th at Plymouth, Torquay, Osborne, Whitechurch, Blackheath, Royal Observatory, Oxford, and Cambridge; on the 8th at Plymouth, Osborne, and in the Midland Counties; on the 9th at Bath and Cambridge; on the 10th at Bath and Somerleyton; on the 11th at Guernsey; on the 12th at Oxford; on the 16th at Plymouth and Oxford; on the 17th at Bath, Oxford, Cambridge, and Rugby; on the 18th at Torquay, Bath, Whitechurch, Oxford, Royston, Cambridge, Rugby, Somerleyton, Wolverhampton, and Leeds; on the 19th at Plymouth, Torquay, and in the Midland and Northern Counties; on the 20th at Guernsey, Plymouth, Torquay, Bath, Oxford, Royston, Cambridge, Rugby, Somerleyton, Wolverhampton, Halifax, Bradford, Leeds, and Stonyhurst; from the 21st to the 25th at Guernsey, Torquay, and in the Midland and Northern Counties; on the 26th at Whitechurch, Blackheath, Royal Observatory, Oxford, Cambridge, Wolverhampton, Halifax, Bradford, Leeds, and Carlisle; on the 27th at Oxford, Wolverhampton, Halifax, Bradford, Leeds, and Carlisle; and on the 28th at Blackheath, Royal Observatory, Oxford, and Leeds.

In March on the 1st at Guernsey and Bath; on the 8th at Guernsey; on the 9th and 10th at Torquay; on the 17th at Bath, Cambridge, and Rugby; on the 18th at Bath and Somerleyton; and on the 26th at Blackheath and Royal Observatory.

*The Observations have been reduced to Mean values by Glueher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.*

The highest temperatures of the air were at Barnstaple, 67°·5; and at Truro, 65°·0.

The lowest temperatures of the air were at Cambridge and Somerleyton, 4°·0; and at Rugby, 6°·4.

The greatest ranges of temperature were at Cambridge, 59°·8; at Somerleyton, 59°·0; and at Rugby, 57°·4.

The least ranges of temperature were at Guernsey, 34°·6; at Liverpool, 36°·3; and at Plymouth, 37°·0.

The greatest number of days of rain were at Somerleyton, 48; and at Guernsey and Hull, 44.

The least number of days of rain were at Barnet, 19; at Barnstaple, 23; and at Osborne, 24.

The greatest falls of rain were at Bath, 7·88 inches; at Truro, 7·52 inches; and at Torquay, 6·92 inches.

The least falls of rain were at Liverpool, 2·04 inches; at Leeds, 2·31 inches; and at Carlisle, 2·73 inches.

#### QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF  LATITUDE, &c.		Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Read ings of the Thermometer. Mean of all Lowest Read ings of the Thermometer. Mean Range of Temper ature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Max imum in Rays of Sun.	Mean Reading of Min imum on Grass.	Mean Estimated Strength.	WIND.				Mean Amount of Onset.	Mean Amount of Cloud.	Number of Days it fell.	RAIN.

# QUARTERLY RETURN

OF

## MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

### ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

*Printed under the Superintendence of Her Majesty's Stationery Office,  
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.*

No. 170.]

**Marriages**—January, February, March, 1891.

**Births and Deaths**—April, May, June, 1891.

[Price 9d.]

*General Register Office, Somerset House,  
31st July, 1891.*

The POPULATION of the UNITED KINGDOM in the middle of 1891 is estimated, on the basis of the recent enumerations, at 37,803,059 persons; that of England and Wales at 29,081,047, of Scotland at 4,040,839, and of Ireland at 4,681,173.

In the United Kingdom 301,210 *births* and 214,854 *deaths* were registered in the three months ending 30th June 1891. The natural increase of population was, therefore, 86,356. The registered number of persons married in the quarter ending 31st March 1891 was 125,594.

The birth-rate in the United Kingdom in the second quarter of 1891 was 32·0 and the death-rate 22·8 per 1000. The marriage-rate in the first quarter of 1891 was 13·5 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

#### ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2122 registration sub-districts of England and Wales during the quarter ending 30th June 1891; and the MARRIAGES in 15,011 churches or chapels, in 10,610 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 31st March 1891.

#### *Marriages.*

During the three months ending with March last the marriages of 98,114 persons were registered in England and Wales, giving an annual rate of 13·7 per 1000 of the estimated population. This is the highest rate recorded in the first quarter of any year since 1876, and is 15 per cent. above the rate in the corresponding periods of the ten years 1881–90. In registration counties the lowest rates were 8·7 in Huntingdonshire, 8·8 in Rutlandshire, 9·0 in Oxfordshire, and 9·1 in Cambridgeshire; and the highest were 15·7 in South Wales, 16·3 in Durham, 16·5 in Monmouthshire, and 16·7 in Northumberland. In Registration London the rate was 15·4.

### *Births.*

The births registered during the three months ending on 30th June numbered 238,825, and were in the proportion of 32·9 annually per 1000 living. This is higher than the rate in the second quarter of any of the four years 1887-90, but practically equal to the mean rate in the corresponding periods of the ten years 1881-90. In registration counties the rates ranged from 26·6 in Sussex, 27·2 in extra-metropolitan Surrey and in Rutlandshire, 27·6 in Herefordshire, and 28·0 in Dorsetshire, to 36·7 in Monmouthshire, 37·4 in South Wales, 38·4 in Staffordshire, and 40·6 in Durham.

In the twenty-eight great towns the birth-rate was 33·3 per 1000 living, and 0·4 per 1000 above that in the whole country. The lowest rates were 25·8 in Huddersfield, 27·0 in Brighton, 27·5 in Halifax, and 29·8 in Plymouth; while the rates in the other towns ranged upwards to 37·3 in Newcastle-upon-Tyne, 38·1 in Preston, 38·2 in Salford, 38·3 in Sheffield, and 38·9 in Sunderland. In fifty other large town districts the birth-rate was 34·8 per 1000, or 1·5 per 1000 above the rate in the larger towns.

### *Excess of Births over Deaths, and Emigration.*

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 99,194, 103,207, and 91,655 respectively in the second quarters of 1888, 1889, and 1890, was 67,270 last quarter.

It appears from returns issued by the Board of Trade that 118,031 emigrants (including 41,219 foreigners), embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionately 611 whose nationality was not distinguished, the emigrants of British origin numbered 76,658, and of these 38,961 were English, 7565 Scotch, and 30,132 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 1340 from England, 1872 from Scotland, and 6437 from Ireland. Each of the proportions shows a considerable decline when compared with the mean proportion in the preceding three years.

### *Prices and Pauperism.*

During the three months ending March last the average price of wheat was 39s. 6d. per quarter, the average prices in the preceding two quarters having been 31s. 10d. and 32s. 11d. The mean wholesale prices of beef and mutton were 5½d. and 7d. per lb. respectively; compared with the prices in the preceding quarter, the price of beef showed an increase of ⅔d. and that of mutton a decrease of ⅔d. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 18s. 2d. per ton, against 14s. 6d. and 17s. 9d. in the second quarters of the preceding two years. The mean price of 2½l. per cent. Consols was 95l. 10s. 5d. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 3l. 10s. to 3l. on the 29th January, was raised to 3l. 10s. on 16th April, to 4l. on 7th May, and to 5l. on 14th May, and was reduced to 4l. on 4th June, and to 3l. on 18th June. The average minimum rate per cent. charged during the quarter was 3l. 16s.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 663,231, of whom 172,510 received in-door, and 490,721 out-door relief. The proportion of the population in receipt of pauper relief was 22·8 per 1000, against 24·9 and 23·6 in the corresponding quarters of 1889 and 1890.

### *Meteorology.*

Remarks upon the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The

mean reading of the barometer was  $29\cdot747$  inches, and was  $0\cdot032$  of an inch below the mean reading for the corresponding quarters of 50 years; the mean was above the average in April and in June, but below in May. The mean temperature of the air during the quarter was  $51\cdot6$ , and  $0\cdot7$  below the average for the corresponding quarters of 120 years. The monthly mean was  $1\cdot9$  below the average in April,  $2\cdot2$  below in May, and  $2\cdot1$  above in June.

In April and the early part of May the weather was generally dry and cold; on the 11th May it suddenly became very warm, and on the 13th the temperature near London reached  $80^{\circ}$ ; on the 15th another sudden change took place, with frost and snow at nearly all the stations of observation, and the weather remained very cold until the end of the month. The weather in June was generally bright, warm, and dry; excepting from the 6th to the 16th of the month the temperature was above the average. At 28 stations of observation the mean temperature during the quarter ranged from  $46\cdot9$  at Halifax and  $47\cdot7$  at Wolverhampton, to  $51\cdot6$  at the Royal Observatory, and  $52\cdot6$  at Truro.

The amount of rain measured at the Royal Observatory, Greenwich, was  $4\cdot37$  ins., and  $1\cdot43$  ins. below the average in the corresponding periods of 76 years. The rainfall was less than half the average in April and in June, but was above the average in May; rain fell on 8 days in April, 18 in May, and 11 in June. The amounts measured during the quarter at 28 stations of observation ranged from  $4\cdot28$  ins. at Whitchurch and  $4\cdot31$  ins. at Osborne, to  $9\cdot14$  ins. at Torquay and  $9\cdot29$  ins. at Hereford.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 433 hours, or  $31\cdot1$  per cent. of the total number of hours the sun was above the horizon, the mean proportion in the second quarters of the ten years 1881-90 having been  $34\cdot8$  per cent. The amount was below the average in each month of the quarter.

### *Deaths.*

During the three months ending with June 171,555 deaths were registered, being in the proportion of 23·7 deaths annually per 1000 persons living. This rate exceeds by 27 per cent. the mean rate in the corresponding periods of the ten years 1881-90, and, with three exceptions, is the highest rate that has been recorded in the second quarter of any year since civil registration began. The lowest rates in registration counties were 16·5 in Dorsetshire, 16·6 in extra-metropolitan Kent, 17·1 in extra-metropolitan Middlesex, and 17·5 in Sussex and in Buckinghamshire; while the highest were 28·0 in North Wales, 29·2 in Lancashire, 30·2 in the West Riding of Yorkshire, and 31·4 in Rutlandshire.

The 171,555 deaths included 89,335 of males, and 82,220 of females, the mean annual mortality of males being 25·4, and that of females 22·0, per 1000 estimated to be living of each sex; these rates being 5·4 and 4·6 per 1000 respectively in excess of the mean rates in the second quarters of the preceding ten years. Out of equal numbers living, the deaths of males were 115 to 100 of females, being equal to the mean proportion in the corresponding quarters of the ten years 1881-90.

**URBAN AND RURAL MORTALITY.**—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country (*see* Table III.), and contain a population estimated at more than eighteen and a half millions, the death-rate last quarter was 24·7 per 1000, while among the remaining and chiefly rural population of nearly ten and a half millions, it was 21·7 per 1000. The urban rate was 5·4 per 1000, while the rural rate was 4·2 per 1000, above the average rates in the second quarters of the ten years 1881-90. Out of equal numbers living the deaths in the urban districts were to those in the rural districts in the proportion of 114 to 100, the mean proportion in the corresponding quarters of the ten years 1881-90 having been 111 to 100.

In the twenty-eight great towns (*see* Tables V. and VI.), with an aggregate population estimated at nearly nine and a half millions, the annual death-rate last quarter was 26·2 per 1000, or 1·9 per 1000 above the general urban rate, and 5·9 per 1000

above the average rate in these towns in the corresponding quarters of the preceding nine years. The lowest rates were 18·2 in Brighton, 20·1 in Norwich, and 20·4 in Bristol; while the highest were 31·8 in Liverpool, 32·0 in Blackburn, 33·3 in Oldham, 33·7 in Manchester, and 34·0 in Sheffield. In Registration London the rate was 23·8.

In fifty other large town districts, with an aggregate population of about three millions, the death-rate last quarter was 24·1 per 1000, or 2·1 per 1000 below the rate in the larger towns, 0·2 per 1000 below the general urban rate, and 0·4 per 1000 above the rate in the whole country.

**MORTALITY AT DIFFERENT AGES.**—Of the 171,555 deaths registered last quarter, 34,576 were of infants under one year of age, 82,790 of persons aged between one and 60 years, and 54,189 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 145 deaths to 1000 births registered, exceeding by 20 per 1000 the mean proportion in the second quarters of the ten years, 1881–90. The lowest proportions in registration counties were 74 in Dorsetshire, 84 in Hertfordshire, 90 in Wiltshire, and 92 in Buckinghamshire; while the highest were 178 in Lancashire, 184 in the West Riding of Yorkshire, 185 in Leicestershire, and 227 in Rutlandshire. In the twenty-eight great towns the mean proportion was 160 per 1000, exceeding by 15 per 1000 the general English rate; the proportions ranging from 111 in Brighton, 122 in Norwich, 130 in Cardiff, and 131 in Birkenhead, to 206 in Bradford, 207 in Manchester, 222 in Blackburn, and 224 in Leicester. In fifty other large town districts the infant mortality averaged 153 per 1000 births, and the proportions ranged from 77 in Chester, 90 in Colchester, and 97 in Chatham, to 193 in Stoke-upon-Trent and in Ystradyfodwg, 202 in Bury, and 244 in Stockport.

The mortality of persons aged between one and 60 years was in the proportion of 12·7 deaths annually per 1000 of the estimated number living at these ages, and exceeded the average rate in the corresponding quarters of the ten years, 1881–90, by 2·2 per 1000. In the twenty-eight great towns the rate was 15·2 per 1000; the lowest rates being 9·1 in Brighton, 9·6 in Norwich, 11·3 in Plymouth, and 11·6 in Bristol, and the highest 19·3 in Sheffield, 20·3 in Liverpool, 20·6 in Oldham, and 20·7 in Manchester.

Among persons aged 60 years and upwards the mortality was at the rate of 101·3 annually per 1000 persons living at these ages, and exceeded by 32·7 per 1000 the average rate in the second quarters of the ten years 1881–90.

In the twenty-eight great towns the rate was 118·1, ranging from 77·1 in Plymouth, 81·4 in Bristol, and 84·5 in Norwich, to 158·0 in Blackburn, 159·2 in Oldham, and 182·8 in Sheffield.

Compared with the respective average rates in the second quarters of the ten years 1881–90, the mortality of infants under one year of age showed an excess of 16 per cent., that of persons between one and 60 years of age an excess of 21 per cent., and that of persons aged 60 years and upwards an excess of 48 per cent.

**ZYMOTIC DISEASES.**—The 171,555 deaths from all causes included—

3900	attributed to whooping-cough,
3813	„ measles,
1550	„ diarrhœa,
1089	„ diphtheria,
1068	„ scarlet fever,
964	„ fever,
12	„ small-pox.

Thus 12,396 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·71 per 1000 persons living, the average annual rate in the ten preceding second quarters having been 1·89. The rate was below 1·00 per 1000

in Berkshire, Hertfordshire, Buckinghamshire, Wiltshire, Dorsetshire, Herefordshire, Shropshire, Lincolnshire, Derbyshire, and Westmorland, while it was above 2·00 per 1,000 in Cornwall, Staffordshire, Leicestershire, Lancashire, Monmouthshire, and South Wales. In the twenty-eight great towns the rate was 2·11, varying from 0·45 in Brighton and 0·60 in Birkenhead, to 3·08 in Manchester, 3·13 in Liverpool, 3·15 in Salford, 3·46 in Leicester, and 4·23 in Portsmouth. In fifty other considerable town districts it was 2·20, and somewhat higher than in the twenty-eight great towns; while in the remainder of the country it was 1·40.

The 3900 deaths ascribed to *whooping-cough* corresponded to an annual rate of 0·54 per 1000, the average in the ten preceding second quarters having been 0·49. The rate was under 0·10 in Wiltshire, Dorsetshire, and Monmouthshire, while it was 1·03 in Cornwall, 1·24 in Leicestershire, and 1·27 in Rutlandshire. In the twenty-eight great towns the rate was 0·79 per 1000; but while it was only 0·12 in Birkenhead and 0·14 in Brighton, it was 1·56 in Liverpool, 1·78 in Manchester, and 2·05 in Leicester. In fifty other considerable town districts it was 0·51, while in the remainder of the country it was 0·40. Among districts and sub-districts in which the mortality from whooping-cough was apparently in excess were Waltham Abbey, Brixworth, St. Ives, St. Just-in-Penwith, North Worcester, and Gateshead.

The 3813 deaths attributed to *measles* corresponded to an annual rate of 0·53 per 1000, against an average rate of 0·50 in the ten preceding second quarters. The rate did not exceed 0·10 in Middlesex (extra-metropolitan), Hertfordshire, Buckinghamshire, Cambridgeshire, Suffolk, Rutlandshire, Lincolnshire, or Northumberland, while it was 1·17 in Hampshire and in Somersetshire, 1·26 in Monmouthshire, and 1·40 in Staffordshire. In the twenty-eight great towns the rate was 0·57 per 1000, but while no death from this disease occurred in Wolverhampton and only one in Norwich, the rate was 1·34 in Huddersfield, 1·35 in Bristol, 1·56 in Blackburn, and no less than 3·38 in Portsmouth. In fifty other considerable town districts the rate was 0·97, and much higher than in the great towns, while in the remaining parts of the country it was 0·42. Among districts and sub-districts in which the mortality from measles was apparently excessive were Cranleigh, Towcester, Wellingborough, Barking Town, Devizes, Crewkerne, Yeovil, Wolstanton, Stoke-upon-Trent, Norton, West Bromwich, Rugby, Stockport, Leigh, Horwich, Sandal, Bedwelty, and Carnarvon.

The deaths ascribed to *diarrhœa* were 1550, and corresponded to an annual rate of 0·21 per 1000, the average in the ten preceding second quarters having been 0·25. The highest rates in counties were 0·34 in Staffordshire and in Lancashire, 0·35 in Cumberland, 0·36 in Nottinghamshire, and 0·48 in Huntingdonshire. In the twenty-eight great towns the rate was 0·25, rising, however, to 0·54 in Bolton and 0·68 in Blackburn. In fifty other considerable town districts it was 0·26, while in the rest of the country it was 0·19.

The deaths ascribed to *diphtheria* numbered 1089, and corresponded to an annual rate of 0·15 per 1000, against an average of 0·13 in the ten preceding second quarters. The highest rates in the counties were 0·23 in Surrey (extra-metropolitan) and in Sussex, 0·24 in Hertfordshire, 0·25 in Suffolk and in Shropshire, and 0·28 in Essex. In the twenty-eight great towns the rate was 0·19, but while no death from this disease was recorded in Plymouth, Blackburn, Huddersfield, or Halifax, the rate was 0·30 in London, and 0·36 in Salford. In fifty other considerable town districts it was 0·10, while in the remainder of the country it was 0·14. Among districts or sub-districts in which the mortality from diphtheria appears to have been in excess are Epsom, Godshill, Barnet, Coddenhani, Llansilin, Oswestry, Hyde, Heywood, and Denton.

The deaths from *scarlet fever* were 1068, and corresponded to an annual rate of 0·15 per 1000, the average in the ten preceding second quarters having been 0·27. No death from this disease was registered in Hertfordshire, Buckinghamshire, Rutlandshire, or Westmorland, while the highest rates were 0·29 in Monmouthshire, 0·32 in Cumberland, and 0·65 in South Wales. In the twenty-eight great

towns the rate was 0·15, varying, however, from 0·00 in Brighton and in Birkenhead, to 0·77 in Halifax, and 0·94 in Bradford. In fifty other considerable town districts it was 0·20, while in the remainder of the country it was 0·14.

The 964 deaths from *fever*, including typhus, enteric fever, and simple or ill-defined forms of continued fever, corresponded to an annual rate of 0·13 per 1000, the average for the ten next preceding second quarters having been 0·19. No death was ascribed to this cause in Oxfordshire, Huntingdonshire, Bedfordshire, Cornwall, Herefordshire, Rutlandshire, or Westmorland, while the highest county rates were 0·20 in Lancashire and in Durham, 0·22 in Leicestershire, and 0·24 in the North Riding of Yorkshire. In the twenty-eight great towns the rate was 0·16 per 1000, the highest rates being 0·25 in Leicester, 0·28 in Birkenhead, and 0·36 in Manchester. In fifty other considerable town districts the rate was 0·16 per 1000, while in the remaining and mainly rural parts of the country it was 0·11.

The deaths from *small-pox* numbered only 12, of which 4, of Londoners, occurred in the Hospital Ship at Dartford, one in Liverpool, 5 in the Dewsbury district of the West Riding, and one each in Devonshire and Somersetshire.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in fifty other considerable urban districts, and in the remainder of the country :—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the Second Quarter of 1891.

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.

WATERING PLACES AND SUMMER RESORTS.—As usual in the return for the second quarter the deaths from all causes, and from each of the more important zymotic diseases, in several of our chief watering-places, or in the districts which most nearly correspond to them, are shown in Table VIII. For purposes of comparison, the populations according to the recent census enumeration are also given.

CERTIFICATION OF CAUSES OF DEATH.—Of the 171,555 deaths in England and Wales, the causes of 158,777, or 92·5 per cent., were duly certified by registered medical practitioners, and of 8385, or 4·9 per cent., by coroners after inquest, while the causes of the remaining 4393, or 2·6 per cent., of the deaths were not certified. The proportion per cent. of uncertified deaths varied from 0·5 in extra-metropolitan Middlesex, 0·7 in Monmouthshire, 0·9 in Wiltshire, and 1·0 in London, to 4·6 in Westmorland, and 4·8 in Huntingdonshire and in Durham. In North Wales the proportion was 6·0 per cent., and in South Wales 4·1. In the twenty-eight great towns the proportion was 1·8 per cent., ranging from 0·1 in Portsmouth, 0·2 in Plymouth, and 0·5 in Derby and in Birkenhead, to 3·8 in Sheffield, 3·9 in Halifax, 4·4 in Hull, and 4·9 in Liverpool.

**VIOLENT DEATHS.**—To different forms of violence 4677 deaths were referred, showing an annual rate of 0·65 per 1000 living, against an average rate of 6·1 per 1000 in the second quarters of the next preceding ten years. In registration counties the rates ranged from 0·30 in Hertfordshire, 0·32 in Shropshire, 0·41 in Norfolk, and 0·42 in Essex, to 0·82 in Warwickshire, 0·88 in Huntingdonshire and in South Wales, and 0·94 in Monmouthshire. In the twenty-eight great towns the rate was 0·76 per 1000, ranging from 0·38 in Plymouth and in Huddersfield, and 0·42 in Derby, to 1·01 in Birmingham, 1·22 in Liverpool, and 1·23 in Cardiff.

**INQUESTS.**—Inquests were held concerning 8385, or 4·9 per cent. of the total deaths, against a mean proportion of 5·4 per cent. in the next preceding ten second quarters. In the twenty-eight great towns the proportion of inquests to total deaths was 5·8 per cent., and ranged from 1·6 in Huddersfield, 2·4 in Halifax, and 2·7 in Preston, to 7·4 in Plymouth, 7·9 in Newcastle-on-Tyne, and 10·3 in Cardiff.

**DEATHS IN PUBLIC INSTITUTIONS.**—Of the total deaths registered in England and Wales, 20,057, or 11·7 per cent., occurred in workhouses, hospitals, and public lunatic asylums, against a mean proportion of 11·1 per cent. in the second quarters of the next preceding ten years. In the twenty-eight great towns the proportion of deaths in such institutions was 19·1 per cent., and ranged from 6·5 in Plymouth, 8·0 in Bolton, and 8·2 in Huddersfield, to 18·7 in Manchester, 20·1 in Birmingham, and 27·0 in London.

#### HEALTH OF COLONIAL AND FOREIGN CITIES.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in twenty-nine Colonial and Foreign cities, with an aggregate population of about seventeen millions, were equal to an annual rate of 26·4 per 1000 living.

In the twenty European cities the mean death-rate per 1000 was 23·6, against 26·2 in the twenty-eight great English towns. In Paris the rate was 23·5 per 1000, in Berlin 18·0, and in Vienna 27·3, the rate in London being 23·8. Among the twenty-nine Colonial and Foreign cities the lowest death-rates were 18·0 in Berlin, 19·3 in the Hague, and 20·0 in Rotterdam; and the highest were 32·1 in Prague, 42·1 in Madras, 52·7 in Alexandria, and 73·4 in Cairo. *Small-pox* caused 174 deaths in Vienna, 168 in Brussels, and 61 in Bombay. The mortality from *measles* was excessive in Bombay, Madras, Paris, St. Petersburg, Breslau, Vienna, Rome, Cairo, and New York; from *scarlet fever* in St. Petersburg, New York, and Brooklyn; from *diphtheria* in Paris, Amsterdam, Copenhagen, Stockholm, Christiania, and St. Petersburg; in all the nine German and Austrian cities included in the table, and in Rome, Turin, New York, Brooklyn and Philadelphia. The death-rate from "*fever*" showed a marked excess in the Indian and Egyptian cities, and was also high in St. Petersburg and in Philadelphia. The deaths under the heading "*diarrhæal diseases*" included 154 from *cholera* in Calcutta.

\* The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Geographical Counties.

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

\* See pag. 14, note b.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and under one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES ; TUBERCULOSIS, SCURVY, SMALLPOX, MEASLES, DYSENTERY, DIPHTHERIA, COUGHS, CROUP, HOARSENESS, INFLUENZA, AGUE AND FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and DEATHS in INFANCY, CHILDHOOD, YOUTH, ADULT AGE, and OLD AGE, in REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION PARISHES, in ENGLAND.

<sup>a</sup> The Registration Districts, 632 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

<sup>b</sup> These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

<sup>c</sup> See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—REGISTRATION DISTRICTS.—continued.

No.	Registration Districts.	Area in Statute Acres.	Enumerated Population, 1891 (unrevised).	Mar-riages Registered in Quarter ending 31 Mar. 1891.	Births Registered in Quarter ending 30 June 1891.	Deaths Registered in Quarter ending 30 June 1891.	The DEATHS in the Quarter are stated by the Registrars to include														
							Average in Quarters ending 30 June the 3 Years 1888-90.	Deaths of Year of Age.	Deaths from								Inquest Cases, Deaths in Public Institutions.				
									Persons aged 60 Years & upwards.	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.				Cholera.	Violence.

\* The Registration Sub-districts (2124 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates Workhouse Establishment receiving inmates from other Districts than the one in which it stands; H indicates Hospital or Infirmary; and L Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 4th July 1891.

## I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

Registration Sub-districts.		Area in Statute Acres.	Enumerated Population. 1891 (unrevised).	Births		Deaths		The DEATHS in the Quarter are stated by the Registrars to include

a 627 : 3.—The 17 deaths from measles occurred in Carnarvon Urban Sanitary District.

b 630 : 1.—Of the 8 deaths from fever, 6 occurred in the parish of Llangefni.

# METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING JUNE 30TH, 1891.

By JAMES GLAISHER, ESQ., F.R.S., &c.

The weather in April was dry and very cold, throughout. The temperature of the air was below its average on nearly every day. The atmospheric pressure was above its average from the 9th to the 26th, and below on all other days. The fall of rain was small. The prevalent winds were E. and N.E. Owing to the cold winds and low temperature vegetation at the end of the month was very backward.

The weather in May was very changeable, but was mostly cold and unseasonable. The temperature of the air was generally below its average till the 10th day, when a sudden change to warmer weather took place, the 11th, 12th, 13th, and 14th days being above their average mean temperature, that on the 13th as much as  $11^{\circ}$ , when another sudden change took place to colder weather, the mean temperature of the 16th, 17th, and 18th days being as much as  $12\frac{1}{3}^{\circ}$ ,  $14^{\circ}$ , and  $13\frac{3}{4}^{\circ}$  below their averages, and the weather continued cold to the end of the month. On the 13th the temperature about London was about  $80^{\circ}$ ; on the morning of the 18th, the temperature fell below  $32^{\circ}$ , and there was frost over the greater part of England, and the temperature about London did not rise so high as  $50^{\circ}$ . The atmospheric pressure was below its average till the 3rd day and from the 14th, and was above, with the exception of the 9th and 10th, from the 4th to the 14th. On the 18th it was as much as  $0^{\circ}\cdot 62$  below the average for the day. The fall of rain was above the average, it fell on every day from the 18th to the end of the month. The most remarkable circumstance in the month was the fall of snow on the 15th, 16th, 17th, and 18th days following so soon after the hot weather of the 11th to the 14th; the snow fell at nearly all stations from Torquay in the south to Carlisle in the north. Small in quantity at southern stations, but to the depth of two to six or more inches in the midland, eastern, and northern counties. Vegetation at the end of the month was very backward.

The weather in June for the most part was bright, warm, dry, and seasonable. The temperature of the air was above its average till the 5th day, below from the 6th to the 16th, and above again from the 17th to the end of the month. The atmospheric pressure was below its average till the 10th, above from the 11th to the 22nd, and below again from the 23rd to the 30th. The fall of rain was small and below its average. There have been only 13 instances of as small or smaller fall of rain in the month of June back to the year 1815, viz. :—

in.	in.	in.
1886 it was $0^{\circ}\cdot 44$	1855 it was $0^{\circ}\cdot 70$	1827 it was $0^{\circ}\cdot 70$
1877 " $0^{\circ}\cdot 70$	1850 " $0^{\circ}\cdot 90$	1825 " $0^{\circ}\cdot 80$
1870 " $0^{\circ}\cdot 39$	1849 " $0^{\circ}\cdot 30$	1822 " $0^{\circ}\cdot 90$
1868 " $0^{\circ}\cdot 50$	1846 " $0^{\circ}\cdot 50$	1818 " $0^{\circ}\cdot 70$
1864 " $0^{\circ}\cdot 90$		

The month was favourable for agriculture, but from the preceding long continued cold weather, crops were generally backward, and hay-making at the end of the month had not begun.

About London the mean daily temperature of the air was generally below its average from April 1st till the 6th of May; the mean daily deficiency for these 36 days being  $3^{\circ}\cdot 2$ ; from May 7th to the 12th it was above, particularly so on the 13th when it was  $10^{\circ}\cdot 9$  in excess of the average, the mean daily excess for these 8 days being  $3^{\circ}\cdot 5$ ; from May 16th to the 30th it was below its average, being particularly so on the 16th, 17th, 18th, and 25th days, when the deficiency was as much as  $12^{\circ}\cdot 5$ ,  $14^{\circ}\cdot 0$ ,  $13^{\circ}\cdot 7$ , and  $12^{\circ}\cdot 5$  respectively; the mean daily deficiency for these 16 days being  $8^{\circ}\cdot 0$ ; from May 31st to June 5th it was above the mean daily excess, being  $2^{\circ}\cdot 0$ ; from June 6th to the 16th it was generally below, the mean daily deficiency being  $2^{\circ}\cdot 9$ ; and from the 17th to the end of the month it was generally above, the mean daily excess being  $3^{\circ}\cdot 2$ .

The mean temperature of the air for April was  $44^{\circ}\cdot 2$ , being  $1^{\circ}\cdot 9$  and  $2^{\circ}\cdot 7$  below the average of 120 and 50 years respectively; it was  $1^{\circ}\cdot 4$  and  $1^{\circ}\cdot 5$  lower than in 1890, and 1889 respectively, and  $0^{\circ}\cdot 8$  higher than in 1888.

The mean temperature of the air for May was  $50^{\circ}\cdot 3$ , being  $2^{\circ}\cdot 2$  and  $2^{\circ}\cdot 3$  below the average of 120 and 50 years respectively. It was  $4^{\circ}\cdot 5$ ,  $6^{\circ}\cdot 2$ , and  $2^{\circ}\cdot 7$  lower than in 1890, 1889, and 1888 respectively, and there were only nine instances of as low or lower temperature back to the year 1841, viz. :—

1887 it was $49^{\circ}\cdot 8$	1877 it was $48^{\circ}\cdot 9$	1856 it was $49^{\circ}\cdot 5$
1885 " $49^{\circ}\cdot 9$	1876 " $49^{\circ}\cdot 4$	1855 " $48^{\circ}\cdot 8$
1879 " $48^{\circ}\cdot 4$	1866 " $50^{\circ}\cdot 1$	1845 " $49^{\circ}\cdot 4$

The mean temperature of the air for June was  $60^{\circ}\cdot 4$ , being  $2^{\circ}\cdot 1$  and  $1^{\circ}\cdot 5$  above the average of 120 and 50 years respectively; it was  $2^{\circ}\cdot 3$  higher than in 1890,  $1^{\circ}\cdot 0$  lower than in 1889, and  $2^{\circ}\cdot 1$  higher than in 1888.

The mean high day temperature of the air for April was  $53^{\circ}\cdot 6$ , being  $3^{\circ}\cdot 6$  below the average of 50 years; it was  $1^{\circ}\cdot 4$  and  $1^{\circ}\cdot 1$  lower than in 1890 and 1889, and  $1^{\circ}\cdot 0$  higher than in 1888; and there were only three instances of as low or lower temperature back to the year 1841, viz. :—

1888 it was $52^{\circ}\cdot 6$	1879 it was $52^{\circ}\cdot 6$	1849 it was $52^{\circ}\cdot 5$
---------------------------------	---------------------------------	---------------------------------

The mean high day temperature of the air for May was  $61^{\circ}\cdot 4$ , being  $2^{\circ}\cdot 8$  below the average of 50 years; it was  $4^{\circ}\cdot 9$ ,  $5^{\circ}\cdot 8$ , and  $6^{\circ}\cdot 5$  lower than in 1890, 1889, and 1888 respectively; and there were only eleven instances of as low or lower temperature back to 1841, viz.:—

1887 it was $59^{\circ}\cdot 0$	1869 it was $60^{\circ}\cdot 7$	1855 it was $59^{\circ}\cdot 9$
1885 „ $60^{\circ}\cdot 3$	1866 „ $61^{\circ}\cdot 4$	1851 „ $61^{\circ}\cdot 4$
1879 „ $58^{\circ}\cdot 4$	1857 „ $57^{\circ}\cdot 1$	1845 „ $59^{\circ}\cdot 6$
1877 „ $59^{\circ}\cdot 3$	1856 „ $59^{\circ}\cdot 2$	

The mean high day temperature of the air for June was  $72^{\circ}\cdot 2$ , being  $1^{\circ}\cdot 4$  above the average of 50 years; it was  $3^{\circ}\cdot 0$  higher than in 1890,  $0^{\circ}\cdot 7$  lower than in 1889, and  $3^{\circ}\cdot 0$  higher than in 1888.

The mean low night temperature of the air for April was  $36^{\circ}\cdot 2$ , being  $2^{\circ}\cdot 7$  below the average of 50 years; it was  $1^{\circ}\cdot 6$ ,  $2^{\circ}\cdot 7$ , and  $0^{\circ}\cdot 1$  lower than in 1890, 1889, and 1888 respectively; and there were only four instances of as low or lower temperature back to the year 1841, viz.:—

1887 it was $35^{\circ}\cdot 3$	1860 it was $35^{\circ}\cdot 6$
1861 „ $39^{\circ}\cdot 0$	1852 „ $34^{\circ}\cdot 2$

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (-) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	APRIL.			MAY.			JUNE.		
	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.
N.W.	d. 4	d. 4½	- ½	d. 4	d. 1½	+ 2½	d. 4	d. 2½	+ 1½
N.	4	3	+ 1	5	4½	+ ½	4	3½	+ ½
N.E.	11	3½	+ 7½	6	7½	- 1½	8	3½	+ 4½
E.	2	2½	- ½	2	2½	- ½	2	2½	- ½
S.E.	2	3½	- 1½	1	1½	- ½	3	1½	+ 1½
S.	1	2½	- 1½	4	2½	+ 1½	2	2½	- ½
S.W.	5	6½	- 1½	7	8½	- 1½	4	10	- 6
W.	1	4	- 3	2	2½	- ½	3	4	- 1

The sign (+) denotes excesses over averages; the numbers affected by this sign in April are N.E. and N.; in May are N.W., S., and N.; and in June are N.E., N.W., and S.E.

The sign (-) denotes deficiencies below averages; the numbers affected by this sign in April are W., S.W., S., and S.E.; in May are N.E., S.W., and S.E.; and in June are S.W., W., S., and E.

The mean low night temperature of the air for May was  $41^{\circ}7$ , being  $2^{\circ}1$  below the average of 50 years; it was  $2^{\circ}7$ ,  $6^{\circ}2$ , and  $4^{\circ}1$  lower than in 1890, 1889, and 1888 respectively; and there were only seven instances of as low or lower temperature back to 1841, viz. :—

1885 it was $41^{\circ}3$	1876 it was $39^{\circ}2$	1866 it was $40^{\circ}8$
1879 „ $40^{\circ}1$	1874 „ $40^{\circ}7$	1855 „ $40^{\circ}5$
1877 „ $41^{\circ}4$		

The mean low night temperature of the air for June was  $51^{\circ}3$ , being  $1^{\circ}5$  above the average of 50 years; it was  $1^{\circ}7$  higher than in 1890,  $0^{\circ}4$  lower than in 1889, and  $1^{\circ}4$  higher than in 1888.

The mean daily range for April was  $17^{\circ}4$ , being  $0^{\circ}9$  smaller than the average; in May it was  $19^{\circ}7$ , being  $0^{\circ}7$  smaller than the average; and in June it was  $20^{\circ}9$ , being  $0^{\circ}1$  smaller than the average.

The mean temperature of the air for April was  $3^{\circ}9$  warmer than in March; in May it was  $6^{\circ}1$  warmer than in April; and in June it was  $1^{\circ}01$  warmer than in May.

(From the preceding 50 years' observations the increase from March to April is  $5^{\circ}4$ , from April to May  $5^{\circ}7$ , and from May to June  $6^{\circ}3$ .)

From March to April there was an increase of temperature at all stations; at those south of  $51^{\circ}$  of  $4^{\circ}1$ ; between  $51^{\circ}$  and  $52^{\circ}$  of  $3^{\circ}8$ ; between  $52^{\circ}$  and  $53^{\circ}$  of  $2^{\circ}9$ ; and at stations north of this parallel of  $3^{\circ}5$ .

From April to May there was an increase of  $4^{\circ}9$  at stations south of  $51^{\circ}$ ; and of about  $5^{\circ}8$  at stations north of this parallel.

From May to June there was an increase of  $8^{\circ}4$  at stations south of  $51^{\circ}$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $9^{\circ}6$ , and north of this parallel of  $9^{\circ}2$ .

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of April was  $29.793$  ins., being  $0.052$  in. above the average of 50 years. It was  $0.149$  in.,  $0.243$  in., and  $0.086$  in. higher than in 1890, 1889, and 1888 respectively.

The mean reading of the barometer for the month of May was  $29.607$  ins., being  $0.178$  in. below the average of 50 years. It was  $0.059$  in.,  $0.055$  in., and  $0.272$  in. lower than in 1890, 1889, and 1888 respectively, and there has been no instance of so low a mean barometer reading back to the year 1841.

The mean reading of the barometer for June was  $29.841$  ins., being  $0.030$  in. above the average of 50 years. It was  $0.017$  in. higher than in 1890,  $0.013$  in. lower than in 1889, and  $0.089$  in. higher than in 1888.

From March to April there was an increase of atmospheric pressure at all stations, at those south of  $51^{\circ}$  of  $0.10$  in.; and at stations north of this parallel of about  $0.17$  in.

From April to May there was a decrease at all stations, at those south of  $51^{\circ}$  of  $0.16$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0.18$  in.; between  $52^{\circ}$  and  $53^{\circ}$  of  $0.20$  in.; and at stations north of this parallel of  $0.22$  in.

From May to June there was an increase at all stations, at those south of  $52^{\circ}$  of  $0.22$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.25$  in., and at stations north of this parallel of  $0.27$  in.

About London the atmospheric pressure was below its average till April 8th, the mean daily deficiency being  $0.18$  in.; from the 9th to the 26th it was above, the mean daily excess being  $0.21$  in.; from April 27th to May 3rd it was below, the mean daily deficiency being  $0.23$  in.; from May 4th to the 14th it was generally above, the mean daily excess being  $0.04$  in.; from May 15th to June 10th it was below, particularly so on the 18th and 21st of June when it was as much as  $0.62$  and  $0.53$  in. respectively below, the mean daily deficiency for these 27 days being  $0.20$  in.; from June 11th to the 22nd it was above, the mean daily excess being  $0.25$  in.; and from June 23rd to the end of the month it was below, the mean daily deficiency being  $0.11$  in.

*Thunderstorms occurred* in April on the 6th at Oxford; and on the 7th at Halifax.

In May on the 2nd at Royston; on the 15th at Somerleyton, Halifax, and Stonyhurst; on the 20th at Halifax; on the 23rd at Royston and Halifax; on the 24th at Torquay and Tottenham; and on the 27th at Halifax.

In June on the 1st at Torquay, Bath, Blackheath, and Royal Observatory; on the 2nd at Cambridge; on the 3rd at Wolverhampton; on the 4th at Royston, Rugby, and Wolverhampton; on the 5th at Hereford; on the 15th at Oxford, Royston, Cambridge, and Somerleyton; on the 23rd at Somerleyton; on the 24th at Osborne, Bath, Whitechurch, Oxford, Hereford, Llandudno, Liverpool, Halifax, Leeds, and Stonyhurst; and on the 25th at Hereford, Hereford, Cambridge, Rugby, Somerleyton, Wolverhampton, Liverpool, and Halifax.

*Thunder was heard but lightning was not seen* in April on the 5th at Cambridge; and on the 6th at Hereford and Rugby.

In May on the 2nd at Cambridge and Somerleyton; on the 4th at Royston; on the 14th at Somerleyton; on the 15th at Osborne, Royston, and Leeds; on the 17th at Cambridge; on the 19th at Hereford, Cambridge, and Carlisle; on the 23rd at Cambridge and Stonyhurst; on the 25th at Wolverhampton; and on the 27th at Hereford and Wolverhampton.

In June on the 1st at Guernsey and Hereford; on the 2nd at Royston, Rugby, Somerleyton, and Wolverhampton; on the 3rd at Oxford and Rugby; on the 4th at Royston and Cambridge; on

the 5th at Guernsey; on the 8th at Rugby; on the 10th at Halifax; on the 13th at Royston; on the 15th at Cambridge, Rugby, Wolverhampton, and Hull; on the 23rd at Halifax; on the 24th at Rugby; on the 25th at Blackheath, Royal Observatory, and Stonyhurst; and on the 28th at Royston, Cambridge, and Halifax.

*Lightning was seen but thunder was not heard* in April on the 16th at Lowestoft.

In May on the 15th at Carlisle; and on the 19th and 23rd at Cambridge.

In June on the 1st at Oxford; on the 3rd at Bath; on the 4th at Blackheath, Royal Observatory, and Cambridge; on the 23rd at Leeds; on the 24th at Royston and Cambridge; on the 25th at Blackheath and Royal Observatory; and on the 28th at Cambridge.

*Solar halos were seen* in April on the 1st at Oxford and Liverpool; on the 13th at Liverpool; on the 14th at Oxford; on the 20th at Torquay; on the 22nd at Oxford; on the 23rd and 26th at Torquay; on the 27th at Torquay, Oxford, Hereford, and Liverpool; and on the 28th at Liverpool.

In May on the 3rd at Liverpool; on the 6th at Torquay; on the 7th at Oxford; on the 13th at Torquay and Halifax; on the 17th at Torquay; on the 19th at Torquay and Halifax; on the 20th at Torquay; on the 22nd at Halifax; on the 23rd at Torquay and Oxford; on the 26th and 28th at Oxford; on the 29th at Torquay; and on the 30th and 31st at Oxford and Halifax.

In June on the 1st at Oxford and Liverpool; on the 2nd at Torquay and Oxford; on the 4th at Halifax; on the 6th and 8th at Oxford; on the 9th at Oxford, Liverpool, Halifax, and Stonyhurst; on the 11th at Liverpool; on the 13th at Oxford; on the 14th at Liverpool; on the 15th at Torquay and Oxford; on the 16th at Torquay; on the 19th at Oxford, Liverpool, and Stonyhurst; on the 21st and 22nd at Oxford; and on the 27th at Torquay.

*Lunar halos were seen* in April on the 16th at Oxford; and on the 18th and 23rd at Liverpool.

In May on the 18th at Oxford; and on the 19th at Torquay.

In June on the 13th at Oxford and Hereford.

*Snow fell* in April on the 2nd at Oxford and Stonyhurst; on the 7th at Wolverhampton and Halifax; and on the 8th at Rugby, Wolverhampton, Halifax, Hull, Leeds, and Stonyhurst.

In May on the 10th at Halifax; on the 14th at Leeds; on the 15th at Halifax; on the 16th at Torquay, Bath, Blackheath, Royal Observatory, and in the Midland and Northern and Eastern Counties; on the 17th at Oxford, Hereford, Somerleyton, Liverpool, Halifax, Leeds, Stonyhurst, and Carlisle.

*Hail fell* in April on the 3rd at Truro; on the 6th at Cambridge; on the 7th at Hull; on the 11th at Guernsey and Halifax; on the 12th at Oxford, Royston, and Cambridge; on the 14th at Torquay; on the 15th at Oxford; and on the 18th at Royston.

In May on the 2nd at Torquay and Carlisle; on the 3rd at Liverpool; on the 15th, 16th, and 17th it was a general fall throughout the country; on the 19th at Plymouth, Torquay, and Hereford; on the 20th at Torquay, Oxford, Royston, and Hereford; on the 23rd at Halifax and Carlisle; on the 24th at Torquay; on the 26th at Hereford; on the 27th at Torquay, Oxford, Royston, Hereford, and Cambridge; on the 28th at Royston; and on the 29th at Cambridge.

In June on the 25th at Royston, Cambridge, and Halifax.

*Fog prevailed* in April on the 2nd, 3rd, and 4th, at Torquay; on the 5th at Wolverhampton; on the 6th at Torquay; on the 7th at Lowestoft; on the 10th at Bath; on the 11th at Cambridge; on the 14th at Bath; on the 18th at Torquay and Wolverhampton; on the 19th and 21st at Bath; on the 26th at Royston; on the 27th at Royston and Cambridge; on the 28th at Bath; and on the 29th at Torquay.

In May on the 2nd at Torquay; on the 5th at Torquay and Cambridge; on the 6th at Oxford; on the 7th at Guernsey, Royston, and Cambridge; on the 8th at Torquay; on the 9th at Somerleyton; on the 11th and 12th at Guernsey; on the 22nd and 26th at Bath; and on the 30th at Torquay.

In June on the 1st at Torquay; on the 3rd and 4th at Cambridge; on the 5th and 10th at Torquay; on the 11th, 12th, and 13th at Bath; on the 14th at Guernsey; on the 15th at Guernsey and Bath; on the 18th at Torquay and Bath; on the 20th at Bath; on the 23rd at Guernsey and Torquay; on the 24th at Torquay and Bath; on the 25th at Guernsey and Torquay; and on the 26th at Torquay.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING JUNE 30th, 1891.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

NAMES OF STATIONS and OBSERVERS.	Height of Station above Sea Level.	Year 1891.	Pressure of Atmosphere in Month.		Temperature of Air in Month.			Mean Tem- perature.		Vapour.		Mean Reading of Thermometer.		Wind.			Mean Amount of Ozone.	Mean Amount of Cloud.	Number of Days in which it fell.	Rain.										
			Mean.	Range.	Highest.	Lowest.	Range.	Mean		Air.	Dew Point.	Elastic Force.	Mean.	In a cubic foot of Air.	Maximum in Days of Sun.	Minimum in Grains.					Estimated Strength.	Relative Proportion of								
								Of all Highest.	Of all Lowest.													N.	E.	S.	W.

The highest temperatures of the air were at the Royal Observatory, 84°°3; at Osborne, 83°°8; and at Carlisle, 83°°4.

The lowest temperatures of the air were at Barnet, 21°°5; at Hull, 25°°0; and at Whitechurch, 25°°0.

The greatest ranges of temperature were at Hull, 53°°0; at Barnet, 57°°3; and at Blackheath, 56°°3.

The least ranges of temperature were at Guernsey, 38°°9; at Llandudno, 41°°6; and at Eastbourne, 44°°5.

The greatest number of days of rain were at Nottingham, 51; and at Torquay and Hereford, 46.

The least number of days of rain were at Osborne and Barnet, 32; and at Carlisle, 35.

The greatest falls of rain were at Hereford, 9·29 inches; at Torquay, 9·14 inches; and at Wolverhampton, 8·27 inches.

The least falls of rain were at Whitechurch, 4·28 inches; at Osborne, 4·31 inches; and at the Royal Observatory, 4·37 inches.

#### QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Read- ings of the Thermometer in the Quarter.	Mean of all Lowest Read- ings of the Thermometer in the Quarter.	Mean Range of Temper- ature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Max- imum in Rays of Sun.	Mean Reading of Min- imum on Grass.	Mean Estimated Strength.	WIND.				Mean Amount of Ozone	Mean Amount of Cloud.	Number of Days it fell.

[38.—2750.—7/91.]

QUARTERLY RETURN  
OF  
MARRIAGES, BIRTHS, AND DEATHS  
REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF  
ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,  
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

---

No. 171.] **Marriages—April, May, June, 1891.** [Price 9d.  
**Births and Deaths—July, August, September, 1891.**

---

General Register Office, Somerset House,  
28th October 1891.

The POPULATION of the UNITED KINGDOM in the middle of 1891 is estimated, on the basis of the recent enumerations, at 37,803,059 persons; that of England and Wales at 29,081,047, of Scotland at 4,040,839, and of Ireland at 4,681,173.

In the United Kingdom 280,657 *births* and 150,353 *deaths* were registered in the three months ending 30th September 1891. The natural increase of population was, therefore, 130,304. The registered number of persons married in the quarter ending 30th June 1891 was 129,516.

The birth-rate in the United Kingdom in the third quarter of 1891 was 29·5 and the death-rate 15·8 per 1000. The marriage-rate in the second quarter of 1891 was 13·7 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2123 registration sub-districts of England and Wales during the quarter ending 30th September 1891; and the MARRIAGES in 15,021 churches or chapels, in 10,659 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 30th June 1891.

*Marriages.*

During the three months ending 30th June last the marriages of 105,086 persons were registered in England and Wales, giving an annual rate of 14·5 per 1000 of the estimated population. This is the lowest rate recorded in the second quarter of any year since 1883, and 6 per cent. below the mean rate in the corresponding periods of the ten years 1881–90. In registration counties the lowest rates were 8·9 in Huntingdonshire, 9·6 in extra-metropolitan Middlesex, 10·6 in Cambridgeshire and in Suffolk, and 10·9 in Hertfordshire; while the highest were 16·2 in South Wales, 16·4 in Durham, 17·3 in Northumberland and in Monmouthshire, 17·5 in Lincolnshire, and 18·5 in Westmorland. In Registration London the rate was 15·6.

### *Births.*

The births registered during the three months ending 30th September numbered 224,089, and were in the proportion of 30·6 annually per 1000 living. This rate is slightly higher than the rate in the third quarter of 1890, but 1·3 per 1000 less than the mean rate in the corresponding periods of the ten years 1881-90. In registration counties the rates ranged from 24·6 in Rutlandshire, 25·2 in Herefordshire, 25·3 in Hertfordshire, 25·6 in Sussex, and 25·7 in extra-metropolitan Surrey, to 34·2 in South Wales, 34·3 in Northumberland, 34·9 in Staffordshire, 35·3 in Monmouthshire, and 37·8 in Durham.

In the twenty-eight great towns the birth-rate was 31·5 per 1000 living, and 0·9 per 1000 above the rate in the whole country. The lowest rates were 24·1 in Huddersfield, 24·5 in Halifax, 25·6 in Brighton, and 28·0 in Bradford; while the rates in the other towns ranged upwards to 34·8 in Sheffield and in Cardiff, 35·0 in Preston, 35·2 in Newcastle-upon-Tyne, and 35·4 in Sunderland. In fifty other large town districts the birth-rate was 33·0 per 1000, or 1·5 per 1000 above the rate in the larger towns.

### *Excess of Births over Deaths, and Emigration.*

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 106,770, 97,979, and 97,984 respectively in the third quarters of 1888, 1889, and 1890, was 107,620 last quarter.

It appears from returns issued by the Board of Trade that 105,832 emigrants (including 34,524 foreigners), embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionately 862 whose nationality was not distinguished, the emigrants of British origin numbered 71,157, of whom 48,628 were English, 7554 Scotch, and 14,975 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 1672 from England, 1869 from Scotland, and 3199 from Ireland. Each of the proportions shows a slight increase when compared with that in the third quarter of 1890, but a decrease when compared with the mean proportion in the three years 1888-90.

### *Prices and Pauperism.*

During the three months ending September last the average price of wheat was 38s. 11d. per quarter, the average prices in the preceding two quarters having been 32s. 11d. and 39s. 6d. The mean wholesale prices of beef and mutton were 6d. and 7½d. per lb. respectively; compared with the prices in the preceding quarter, the prices of beef and of mutton had both increased ½d. per lb. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 18s. 8d. per ton, against 15s. 9d. and 18s. 8d. in the third quarters of the preceding two years. The mean price of 2½l. per cent. Consols was 95l. 10s. 11d. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 4l. to 3l. on 18th June, was further reduced to 2l. 10s. on 2nd July, but was again raised to 3l. on 24th September. The average minimum rate per cent. charged during the quarter was 2·54l.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 639,374, of whom 164,799 received in-door, and 474,575 out-door relief. The proportion of the population in receipt of pauper relief was 22·0 per 1000, against 24·0 and 22·9 in the corresponding quarters of 1889 and 1890.

### *Meteorology.*

Remarks upon the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The mean reading of the barometer was 29.746 inches, and was 0.048 of an inch below the mean reading in the corresponding quarters of 50 years; the mean was slightly below the average in July, considerably below in August, and slightly above in September. The mean temperature of the air during the quarter was  $59^{\circ} \cdot 3$ , and  $0^{\circ} \cdot 4$  below the average in the corresponding quarters of 120 years. The monthly mean was  $1^{\circ} \cdot 4$  below the average in July,  $2^{\circ} \cdot 3$  below in August, and  $2^{\circ} \cdot 6$  above in September. Throughout July and August the weather was, with the exception of about seven days, cold, dull, and sunless; heavy gales and rain in August seriously delayed and injured the crops of hay, grain, hops, and fruit. After the 7th of September the weather became fine and warm, and, with few exceptions, remained so till the end of the quarter. At 25 stations of observation the mean temperature during the quarter ranged from  $55^{\circ} \cdot 8$  at Halifax,  $56^{\circ} \cdot 1$  at Stonyhurst, and  $57^{\circ} \cdot 0$  at Nottingham and at Liverpool, to  $59^{\circ} \cdot 3$  at Truro and at the Royal Observatory,  $59^{\circ} \cdot 6$  at Camden Square, and  $59^{\circ} \cdot 8$  at Carlisle.

The amount of rain measured during the quarter at the Royal Observatory, Greenwich, was 7.93 ins., and 0.63 ins. above the average in the corresponding periods of 76 years. Compared with the monthly averages in 76 years the rainfall was 32 per cent. in excess in July and 58 per cent. in excess in August, while in September it was 65 per cent. below the average. At 26 stations of observation the amounts measured ranged from 6.27 ins. at Nottingham, 6.93 ins. at Llandudno, and 7.06 ins. at Royston, to 14.74 ins. at Carlisle, 15.23 ins. at Bath, and 18.01 ins. at Stonyhurst.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 431 hours, or 32.6 per cent. of the total number of hours the sun was above the horizon, the mean proportion in the third quarters of the ten years 1881-90 having been 33.6 per cent. The amount was below the average in July and in August, but exceeded the average in September.

### *Deaths.*

During the three months ending 30th September 116,469 deaths were registered, being in the proportion of 15.9 deaths annually per 1000 persons living. This is 1.4 per 1000 below the mean rate in the corresponding periods of the ten years 1881-90, and, with the single exception of 1888, the lowest rate recorded in the third quarter of any year since civil registration began. In registration counties the rates ranged from 11.4 in Dorsetshire, 11.8 in extra-metropolitan Surrey, 12.6 in Sussex and in Bedfordshire, 12.7 in Berkshire, 12.8 in Cambridgeshire, and 12.9 in Buckinghamshire and in Wiltshire, to 17.0 in Monmouthshire, 17.4 in South Wales, 18.3 in Durham, 18.6 in Northumberland, and 19.0 in Lancashire.

The 116,469 deaths included 60,724 of males, and 55,745 of females, the mean annual mortality of males being 17.1, and that of females 14.8, per 1000 estimated to be living of each sex; these rates were 1.3 and 1.4 per 1000 below the mean rates in the third quarters of the preceding ten years. Out of equal numbers living, the deaths of males were 116 to 100 of females, the mean proportion in the third quarters of the ten years 1881-90 having been 114 to 100.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country (see Table III.), and contain a population estimated at more than eighteen and a half

millions, the death-rate last quarter was 16·8 per 1000, while among the remaining and chiefly rural population of nearly ten and a half millions, it was 14·2 per 1000. These rates were 2·0 and 0·6 respectively below the average rates in the third quarters of the ten years 1881-90. Out of equal numbers living the deaths in the urban districts were to those in the rural districts in the proportion of 118 to 100, the mean proportion in the third quarters of the preceding ten years having been 127 to 100.

In the twenty-eight great towns (*see* Tables V. and VI.), with an aggregate population estimated at nearly nine and a half millions, the annual death-rate last quarter was 18·1 per 1000, or 1·3 per 1000 above the general urban rate, and 2·2 per 1000 below the average rate in these towns in the third quarters of the preceding nine years. The lowest rates were 14·2 in Brighton and in Bristol, 14·3 in Portsmouth, 14·5 in Halifax, and 14·9 in Derby; while the highest were 22·4 in Liverpool, 24·1 in Sunderland, and 26·7 in Preston. In Registration London the rate was 17·4.

In fifty other large town districts, with an aggregate population of about three millions, the death-rate last quarter was 16·6 per 1000, or 1·5 per 1000 below the rate in the larger towns, but 0·7 per 1000 above the general rate in the whole country.

**MORTALITY AT DIFFERENT AGES.**—Of the 116,469 deaths registered last quarter, 32,664 were of infants under one year of age, 53,920 of persons aged between one and 60 years, and 29,885 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 146 deaths to 1000 births registered, being 12 per 1000 less than the mean proportion in the third quarters of the ten years, 1881-90. The lowest proportions in registration counties were 60 in Huntingdonshire, 65 in Dorsetshire, 72 in Wiltshire, and 83 in extra-metropolitan Surrey and in Berkshire; while the highest were 178 in Durham, 180 in Lancashire, 181 in Northumberland, and 191 in Leicestershire. In the twenty-eight great towns the mean proportion was 189 per 1000, or 43 per 1000 in excess of the general English rate; the proportions ranging from 104 in Bristol, 130 in Halifax, 141 in Portsmouth, and 142 in Cardiff, to 243 in Wolverhampton, 247 in Sunderland, 277 in Leicester, and 357 in Preston. In fifty other large town districts the infant mortality averaged 151 per 1000 births, the proportions ranging from 69 in Hastings, 85 in Ipswich, 92 in Burton-on-Trent, and 93 in Cheltenham, to 202 in Rotherham, 203 in St. Helens and in Ashton-under-Lyne, 214 in Wigan, and 218 in Stockport.

The mortality of persons aged between one and 60 years was in the proportion of 8·2 deaths annually per 1000 of the estimated number living at these ages, being 0·9 per 1000 below the average rate in the corresponding quarters of the ten years, 1881-90. In the twenty-eight great towns the rate was 9·6 per 1000; the lowest rates being 6·9 in Norwich, 7·1 in Brighton and in Portsmouth, and 7·3 in Leicester, and the highest 11·1 in Preston, 11·2 in Manchester, 13·0 in Sunderland, and 13·8 in Liverpool.

Among persons aged 60 years and upwards the mortality was at the rate of 55·3 annually per 1000 persons living at these ages, differing only slightly from the average rate in the third quarters of the ten years 1881-90. In the twenty-eight great towns the rate was 57·4 per 1000, ranging from 47·1 in Plymouth, 47·9 in Norwich, and 50·0 in Brighton, to 67·4 in Huddersfield, 68·6 in Blackburn, 70·9 in Preston, and 81·2 in Oldham.

Compared with the respective average rates in the third quarters of the ten years 1881-90, the mortality of infants under one year of age showed a decrease of

7·6 per cent., and that of persons between one and 60 years of age a decrease of 9·9 per cent., while that of persons aged 60 years and upwards remained practically stationary.

**ZYMOTIC DISEASES.**—The 116,469 deaths from all causes included—

6976	attributed to diarrhœa,
2371	„ whooping-cough,
1660	„ measles,
1072	„ fever,
1023	„ diphtheria,
985	„ scarlet fever,
12	„ small-pox.

Thus 14,099 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·93 per 1000 persons living, the average annual rate in the ten preceding third quarters having been 2·96. The rate was below 1·00 per 1000 in Sussex, Berkshire, Hertfordshire, Buckinghamshire, Oxfordshire, Huntingdonshire, Bedfordshire, Cambridgeshire, Suffolk, Wiltshire, Dorsetshire, Gloucestershire, Herefordshire, Rutlandshire, Lincolnshire, and North Wales, while it was above 2·00 per 1,000 in Staffordshire, Warwickshire, Leicestershire, Lancashire, the West Riding of Yorkshire, Durham, Northumberland, and Monmouthshire. In the twenty-eight great towns the rate was 2·87, ranging from 0·87 in Halifax and 0·89 in Bristol, to 4·13 in Plymouth, 5·20 in Leicester, 5·50 in Sunderland, and 6·84 in Preston. In fifty other considerable town districts the rate was 2·00, while in the remainder of the country it was 1·39.

The 6976 deaths ascribed to *diarrhœa* corresponded to an annual rate of 0·96 per 1000, the average in the ten preceding third quarters having been 1·63. The rate was under 0·20 in Oxfordshire, Cambridgeshire, Dorsetshire, Herefordshire, and Rutlandshire, while it reached 1·28 in Durham, 1·41 in Lancashire, 1·59 in Registration London, and 2·29 in Leicestershire. In the twenty-eight great towns the rate was 1·69 per 1000; but while it was only 0·10 in Halifax and 0·29 in Huddersfield, it reached 2·60 in Leeds, 2·88 in Sunderland, 3·05 in Wolverhampton, 4·60 in Leicester, and 6·02 in Preston. In fifty other considerable town districts the rate was 0·96, while in the remainder of the country it was 0·55. Among districts and sub-districts in which the mortality from diarrhœa was apparently excessive were Brentford, Tottenham, Plaistow, East Ham, Burslem, Longton, Aston Manor, Ilkeston, Bulwell, St. Helens, Wigan, Hindley, Westleigh, Burnley, Darfield, Rotherham, Kimberworth, and Gateshead.

The 2371 deaths from *whooping-cough* corresponded to an annual rate of 0·32 per 1000, coinciding exactly with the average rate in the ten preceding third quarters. No death from this disease was registered in Huntingdonshire, and the rate was below 0·10 in Dorsetshire, Gloucestershire, the North Riding of Yorkshire, and Westmorland, while it reached 0·55 in Registration London, 0·56 in Durham, and 0·59 in Cambridgeshire. In the twenty-eight great towns the rate was 0·44, ranging from 0·04 in Birkenhead and 0·13 in Derby, to 0·73 in Newcastle-upon-Tyne and 1·14 in Plymouth. In fifty other considerable town districts the rate was 0·27, while in the remainder of the country it was also 0·27. Among districts and sub-districts in which the mortality from whooping-cough appears to have been excessive were Ryde, Hitchin, East Budleigh, Bideford, Stratton, St. Just-in-Penwith, St. Buryan, Wigston, and Lathom.

The 1660 deaths ascribed to *measles* corresponded to an annual rate of 0·23 per 1000, the average in the ten preceding third quarters having been 0·30. No death from this disease was registered in Berkshire, Huntingdonshire, Cambridgeshire, or Rutlandshire, while the highest rates were 0·43 in Durham, 0·46 in Cornwall, and 0·72 in Monmouthshire. In the twenty-eight great towns the rate

was 0·23, but while no death from the disease was registered in Brighton, Norwich, Wolverhampton, Huddersfield, or Halifax, the rates ranged upwards to 0·47 in Plymouth, and 1·83 in Sunderland. In fifty other considerable town districts the rate was 0·33, while in the remaining parts of the country it was 0·20. Among districts and sub-districts in which the mortality from measles was apparently excessive were Aylesford, Strood, Newport (Isle of Wight), Towcester, Exmouth, Penzance, Trentham, Cannock, South-west Worcester, Warrington, and Aberystwith.

The 1072 deaths attributed to *fever*, corresponded to an annual rate of 0·15 per 1000, which is the lowest rate in any third quarter on record, and 0·08 below the average rate in the third quarters of the ten years 1881-90. No death from fever was registered in Dorsetshire or Rutlandshire, and the rate did not exceed 0·05 per 1000 in Berkshire, Buckinghamshire, Northamptonshire, Bedfordshire, Wiltshire, Cornwall, or Herefordshire; while the highest rates were 0·23 in Leicestershire, in Nottinghamshire, in the East Riding of Yorkshire, and in Durham, and 0·24 in Cheshire and in Northumberland. In the twenty-eight great towns the rate was 0·17, ranging from 0·07 in Bristol, 0·09 in Newcastle-upon-Tyne, and 0·11 in Preston, to 0·36 in Liverpool, 0·40 in Sunderland, and 0·60 in Birkenhead. In fifty other considerable town districts the rate was 0·15, while in the remaining parts of the country it was 0·13. Among districts and sub-districts in which the mortality from fever was apparently excessive were Prittlewell, Great Grimsby, Pontefract, Blyth, and St. Woollos.

The 1023 deaths ascribed to *diphtheria* corresponded to an annual rate of 0·14 per 1000, coinciding exactly with the average rate in the ten preceding third quarters. The rate did not exceed 0·03 in Northamptonshire or Lincolnshire, while it reached 0·21 in extra-metropolitan Surrey, 0·22 in Buckinghamshire, 0·27 in Essex, and 0·31 in Registration London. In the twenty-eight towns the rate was 0·19 per 1000, but while no death from the disease was registered in Plymouth, Derby, Bolton, Blackburn, Halifax, or Sunderland, the rates in other towns ranged upwards to 0·42 in Salford. In fifty other considerable town districts the rate was 0·09, while in the remaining parts of the country it was 0·12. Among districts and sub-districts in which the mortality from diphtheria was apparently excessive were Epsom, Eastbourne, North Horsham, Cookham, Waddesdon, Leyton, Saffron Walden, Wickhambrook, Yatton, South Hamlet (Gloucester), Oswestry, Kidderminster, and Llandwrog.

The 985 deaths ascribed to *scarlet fever* corresponded to an annual rate of 0·13 per 1000, which is the lowest rate on record in any third quarter, and less than half the average rate in the ten immediately preceding third quarters. No death from scarlet fever was registered in Oxfordshire, Huntingdonshire, Cambridgeshire, or Rutlandshire; the rates, however, reached 0·57 in South Wales and 0·65 in Monmouthshire. In the twenty-eight great towns the rate was 0·15 per 1000, but while no death from the disease was registered in Brighton, Norwich, or Derby, the rates reached 0·39 in Sheffield, 0·46 in Huddersfield, and 0·52 in Bradford. In fifty other considerable town districts the rate was 0·20, while in the remainder of the country it was 0·12. Among districts and sub-districts in which the mortality from scarlet fever appears to have been excessive were Dorking, Devizes, Tredegar, Ystradyfodwg, Gelligaer, Aberdare, and St. Davids.

The deaths from *small-pox* numbered only 12, of which one occurred in the Metropolitan Hospital Ship at Dartford, one each in Ashford, Berkeley, King's Norton, and North Leeds sub-districts, 2 in Birmingham, and 5 in Dewsbury.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in fifty other considerable urban districts, and in the remainder of the country:—

**ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES,  
during the Third Quarter of 1891.**

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diar- rhoea.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.	9.
England and Wales	15.9	1.93	0.00	0.23	0.13	0.14	0.32	0.15	0.96
28 Great Towns	13.1	2.87	0.00	0.23	0.15	0.19	0.44	0.17	1.69
50 other Town Districts	16.6	2.00	—	0.33	0.20	0.09	0.27	0.15	0.96
England and Wales, less the 78 Towns	14.6	1.39	0.00	0.20	0.12	0.12	0.27	0.13	0.55

**CERTIFICATION OF CAUSES OF DEATH.**—Of the 116,469 deaths in England and Wales, the causes of 106,128, or 91.1 per cent., were duly certified by registered medical practitioners, and of 7200, or 6.2 per cent., by coroners after inquest, while the causes of the remaining 3141, or 2.7 per cent., were not certified. The proportion per cent. of uncertified deaths varied from 0.8 in extra-metropolitan Middlesex and in Wiltshire, and 1.3 in Rutlandshire, to 4.4 in South Wales, 4.5 in Westmorland, 4.7 in Herefordshire, 4.9 in North Wales, 5.1 in Durham, and 7.0 in Huntingdonshire. In the twenty-eight great towns the proportion was 1.9 per cent., varying from 0.4 in Cardiff, 0.6 in Bolton, 0.7 in Portsmouth and in Plymouth, and 1.0 in London and in Norwich, to 4.2 in Hull, 5.0 in Liverpool, and 5.7 in Halifax.

**VIOLENT DEATHS.**—To different forms of violence 4632 deaths were ascribed corresponding to an annual rate of 0.63 per 1000, which is exactly equal to the average rate in the ten preceding third quarters. In registration counties the rates ranged from 0.24 in Westmorland, 0.33 in Bedfordshire, and 0.39 in Lincolnshire, to 0.75 in Cheshire and in Lancashire, 0.76 in Durham, 0.87 in South Wales, 0.88 in Herefordshire, and 1.03 in Huntingdonshire. In the twenty-eight great towns the rate was 0.73, varying from 0.24 in Halifax and 0.38 in Plymouth, to 0.96 in Newcastle-upon-Tyne, 1.24 in Liverpool, and 1.35 in Cardiff.

**INQUESTS.**—Inquests were held concerning 7200, or 6.2 per cent. of the total deaths, against a mean proportion of 5.6 in the ten preceding third quarters. In the twenty-eight great towns the proportion of inquests to total deaths was 7.0 per cent., ranging from 2.3 in Halifax, 2.9 in Preston, and 4.3 in Sheffield, to 8.6 in Newcastle-upon-Tyne, 8.7 in Birkenhead, and 11.3 in Cardiff.

**DEATHS IN PUBLIC INSTITUTIONS.**—Of the total deaths registered in England and Wales, 13,589, or 11.7 per cent., occurred in workhouses, hospitals, and public lunatic asylums, against a mean proportion of 10.3 per cent. in the ten preceding third quarters. In the twenty-eight great towns the proportion of deaths in such institutions was 18.9 per cent., ranging from 5.4 in Preston and 8.1 in Sunderland, to 20.3 in Birmingham, 22.0 in Bristol, and 25.8 in London.

#### HEALTH OF COLONIAL AND FOREIGN CITIES.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in thirty Colonial and Foreign cities, with an aggregate population of nearly eighteen millions, were equal to an annual rate of 24.7 per 1000 living.

In the twenty-one European cities the mean death-rate per 1000 was 21·6, against 18·1 in the twenty-eight great English towns. In Paris the rate was 19·3 per 1000, in Berlin 22·1, and in Vienna 21·3, the rate in London being 17·4. Among the thirty Colonial and Foreign cities the lowest death-rates were 16·8 in Rotterdam, 17·5 in Stockholm, 17·7 in Amsterdam, 18·3 in Copenhagen, and 18·4 in the Hague; while the highest were 30·4 in Munich, 31·7 in Bombay, 31·8 in Breslau, 51·2 in Alexandria, 57·6 in Cairo, and 73·8 in Madras. *Small-pox* caused 51 deaths in Vienna, 22 in Prague, 18 in Bombay, 16 in Brussels, and 13 in Alexandria. The mortality from *measles* was proportionally highest in Madras, Brussels, St. Petersburg, Munich, Vienna, Trieste, and Cairo; from *scarlet fever* in Stockholm, St. Petersburg, Hamburg, Prague, Buda-Pesth, and New York; from *diphtheria* in Copenhagen, Stockholm, Christiania, Berlin, Dresden, Breslau, Munich, Vienna, Buda-Pesth, Trieste, Turin, Venice, Alexandria, New York, and Brooklyn; and from *whooping-cough* in St. Petersburg. The mortality from "*fever*" showed a marked excess in the three Indian cities, and in St. Petersburg, Rome, and New Orleans, and that from "*diarrhœal diseases*" in Madras, Paris, Brussels, Copenhagen, Stockholm, and Christiania, in all the German and Austrian cities included in the Table, excepting Prague and Trieste, and in Cairo, Alexandria, New York, and Brooklyn.

\* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

\* The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Geographical Counties.

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

c See pag. 14, note

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and Deaths of one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES; Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping-cough, Fever, Diarrhoea, Cholera, and VIOLENCE, also INQUEST CASES and DEATHS in REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION DISTRICTS of ENGLAND.

\* The Registration Sub-districts (2123 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates Workhouse Establishment receiving inmates from other Districts than the one in which it stands; H indicates Hospital or Infirmary; and L Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 3rd October 1891.

\* 2.—Of the 7 deaths from diphtheria, 3 occurred in July and 4 in September.  
 \* 1 and 2.—On the 1st of September 1891 the parishes of Arlington and Hailsham were transferred from the Hailsham sub-district to the Brighton sub-district, and the parishes of Warbleton and Heathfield were transferred from the sub-district of Hellingly to that of Hailsham. The name of the Hailsham sub-district was altered to Herstonceaux.

\* 213 : 2 and 3.—On the 1st of July 1891 the parish of Gorleston was transferred from the district of Mutford to that of Yarmouth, and constituted a new sub-district: and the parishes of Haringfleet, Ashby, and Lound, formerly in the Lowestoft sub-district, together with the parishes of Belton, Bradwell, Burgh Castle, Fritton, and Hopton, formerly in the old sub-district of Gorleston, were constituted a separate sub-district named Belton.

† 219 : 3.—See previous note.

211 : 1.—The 3 deaths from diphtheria occurred in the parish of Stonham Aspill.

a 62½ 1.—Of the 6 deaths from diphtheria, 5 occurred in the parish of Llanllfyni; 5 more deaths occurred in the parish of Llanllan during the first fortnight of October.

## METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING SEPTEMBER 30TH, 1891.

*By* JAMES GLAISHER, Esq., F.R.S., &c.

The weather in July was cold, dull, and unsettled, with a great want of sunshine. The temperature of the air was below its average on every day excepting the 16th and 17th, the 21st, 22nd, and 26th days, and particularly so during the last week. The atmospheric pressure was below its average till the 8th and from the 27th, and generally above from the 19th to the 26th. The fall of rain was variable, but generally less than the average; it fell during the first week and from the 27th. There was very little good haymaking weather during the month.

The month of August was cold, wet, stormy, and ungenial. The temperature of the air, with the exception of two or three days, was below the average, and particularly so till the 7th. The atmospheric pressure was below the average, with the exception of a few days, and particularly so from the 21st to the 27th, during which interval the weather was stormy and there was a great gale on the 25th and 26th. Rain fell frequently and for several days together from the 18th; at Blackheath on the 21st more than one inch in depth of rain fell. The weather greatly delayed the hay crops, and also did damage to the grain crops. The gale of the 25th did much injury to hops and fruit.

The weather in September was for the most part fine and warm, very little rain fell during the first half of the month. The temperature of the air till the 7th, and from the 21st to the 24th, was a little below the average, and was above on all other days. The atmospheric pressure was below the average till the 7th, and was generally above from the 8th. Till the 18th but little rain fell, and then light rain fell for a week. The hay harvest was generally secured and a good deal of grain was gathered in at the end of the month.

About London the mean daily temperature of the air was generally below its average till the 7th of September, being particularly so on the 28th, 29th, and 30th of July, and on the 4th, 6th, and 9th of August, when it was as much as  $8^{\circ} \cdot 7$ ,  $9^{\circ} \cdot 3$ ,  $8^{\circ} \cdot 4$ ,  $9^{\circ} \cdot 0$ ,  $9^{\circ} \cdot 5$ , and  $8^{\circ}$  respectively below the average; the mean daily deficiency for the 69 days ending September 7th being  $2^{\circ} \cdot 5$ ; from September 8th to the 20th it was warm and above its average, being on several days more than  $6^{\circ}$  in excess, the mean daily excess for these 13 days being  $3^{\circ} \cdot 4$ ; from September 21st to the 24th it was below, the mean daily deficiency being  $2^{\circ} \cdot 1$ ; and from the 25th to the end of the quarter it was above, the mean daily excess for the 6 days ending September 30th being  $2^{\circ} \cdot 4$ .

The mean temperature of the air for July was  $60^{\circ} \cdot 3$ , being  $1^{\circ} \cdot 4$  and  $1^{\circ} \cdot 8$  below the average of 120 and 50 years respectively; it was  $0^{\circ} \cdot 8$  higher than in 1890,  $0^{\circ} \cdot 7$  lower than in 1889, and  $2^{\circ} \cdot 4$  higher than in 1888.

The mean temperature of the air for August was  $58^{\circ} \cdot 6$ , being  $2^{\circ} \cdot 3$  and  $2^{\circ} \cdot 8$  below the average of 120 and 50 years respectively; it was  $0^{\circ} \cdot 7$ ,  $1^{\circ} \cdot 4$ , and  $0^{\circ} \cdot 5$  lower than in 1890, 1889, and 1888 respectively, and there were only five instances of as low or lower temperature back to the year 1841, viz. :—

1885 it was $58^{\circ} \cdot 5$	1848 it was $58^{\circ} \cdot 5$	1844 it was $57^{\circ} \cdot 7$
1860 „ $57^{\circ} \cdot 7$	1845 „ $57^{\circ} \cdot 3$	

The mean temperature of the air for September was  $59^{\circ} \cdot 1$ , being  $2^{\circ} \cdot 6$  and  $2^{\circ} \cdot 1$  above the average of 120 and 50 years respectively; it was  $0^{\circ} \cdot 4$  lower than in 1890, and  $3^{\circ} \cdot 3$  and  $3^{\circ} \cdot 4$  higher than in 1889 and 1888 respectively; and there were only 10 instances of as high or higher temperature back to the year 1841, viz. :—

1890 it was $59^{\circ} \cdot 5$	1868 it was $60^{\circ} \cdot 5$	1857 it was $59^{\circ} \cdot 7$
1884 „ $59^{\circ} \cdot 3$	1865 „ $63^{\circ} \cdot 9$	1846 „ $60^{\circ} \cdot 1$
1880 „ $59^{\circ} \cdot 7$	1858 „ $60^{\circ} \cdot 1$	1843 „ $59^{\circ} \cdot 5$
1875 „ $60^{\circ} \cdot 0$		

The mean high day temperature of the air for July was  $71^{\circ} \cdot 7$ , being  $2^{\circ} \cdot 4$  below the average of 50 years; it was  $1^{\circ} \cdot 3$ ,  $0^{\circ} \cdot 2$ , and  $4^{\circ} \cdot 5$  higher than in 1890, 1889, and 1888 respectively.

The mean high day temperature of the air for August was  $69^{\circ} \cdot 3$ , being  $3^{\circ} \cdot 5$  below the average of 50 years; it was  $1^{\circ} \cdot 4$ ,  $2^{\circ} \cdot 0$ , and  $0^{\circ} \cdot 1$  lower than in 1890, 1889, and 1888 respectively; and there were only four instances of as low or lower mean high day temperature back to 1841, viz. :—

1860 it was $67^{\circ} \cdot 2$	1845 it was $67^{\circ} \cdot 7$
1848 „ $68^{\circ} \cdot 9$	1844 „ $67^{\circ} \cdot 9$

The mean high day temperature of the air for September was  $69^{\circ} \cdot 8$ , being  $2^{\circ} \cdot 5$  above the average of 50 years; it was  $1^{\circ} \cdot 4$  lower than in 1890, and  $4^{\circ} \cdot 4$  and  $4^{\circ} \cdot 5$  higher than in 1889 and 1888 respectively; and there were only eight instances of as high or higher temperature back to the year 1841, viz. :—

1875 it was $70^{\circ} \cdot 6$	1858 it was $70^{\circ} \cdot 9$	1846 it was $71^{\circ} \cdot 9$
1868 „ $71^{\circ} \cdot 7$	1857 „ $70^{\circ} \cdot 2$	1843 „ $70^{\circ} \cdot 4$
1865 „ $76^{\circ} \cdot 4$	1854 „ $72^{\circ} \cdot 2$	

The mean low night temperature of the air for July was  $51^{\circ}6$ , being  $1^{\circ}5$  below the average of 50 years; it was of the same value as the reading in 1890,  $1^{\circ}7$ , lower than in 1889, and  $0^{\circ}1$  higher than in 1888.

The mean low night temperature of the air for August was  $51^{\circ}5$ , being  $1^{\circ}5$  below the average of 50 years; it was  $0^{\circ}3$  higher than in 1890,  $0^{\circ}1$  lower than in 1889, and  $0^{\circ}6$  higher than in 1888.

The mean low night temperature of the air for September was  $50^{\circ}2$ , being  $1^{\circ}1$  above the average of 50 years; it was  $0^{\circ}2$  lower than in 1890, and  $2^{\circ}1$  and  $1^{\circ}9$  higher than in 1889 and 1888 respectively.

The mean daily range for July was  $20^{\circ}1$ , being  $0^{\circ}9$  smaller than the average; in August it was  $17^{\circ}8$ , being  $2^{\circ}1$  smaller than the average; and in September it was  $19^{\circ}6$ , being  $1^{\circ}4$  larger than the average.

The mean temperature of the air for July was  $0^{\circ}1$  colder than in June; in August it was  $1^{\circ}7$  colder than in July; and in September it was  $0^{\circ}5$  warmer than in August.

(From the preceding 50 years' observations the increase from June to July is  $3^{\circ}2$ , from July to August the decrease is  $0^{\circ}7$ , and from August to September the decrease is  $4^{\circ}4$ .)

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JULY.			AUGUST.			SEPTEMBER.		
	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	4	3	+ 1	5	3	+ 2	1	4	- 3
N	1	3	- 2	3	3	0	1	6	- 5
N.E.	4	4	0	1	3	- 2	7	2	+ 5
E.	2	3½	- 1½	1	1½	- ½	2	2	0
S.E.	3	2	+ 1	2	1½	+ ½	3	3	0
S.	3	1½	+ 1½	2	3	- 1	3	8	- 5
S.W.	12	10	+ 2	12	12	0	12	3	+ 9
W.	2	4	- 2	5	4	+ 1	1	2	- 1

The sign (+) denotes excesses over averages; the numbers affected by this sign in July are S.W., S., S.E., and N.W.; in August are N.W. and S.E.; and in September are S.W. and N.E.

The sign (−) denotes deficiencies below averages; the numbers affected by this sign in July are N., W., and E.; in August are N.E., S., and E.; and in September are S., N., and N.W.

From June to July there was an increase of temperature of  $1^{\circ}$  stations south of  $51^{\circ}$ ; the readings were about the same value at stations between  $51^{\circ}$  and  $52^{\circ}$ ; an increase of  $1^{\circ} \cdot 1$  at stations south of  $53^{\circ}$ ; and at stations north of this parallel an increase of  $1^{\circ} \cdot 4$ .

From July to August there was a decrease at all stations; at those south of  $51^{\circ}$  of  $0^{\circ} \cdot 8$ ; between  $51^{\circ}$  and  $52^{\circ}$  of  $1^{\circ} \cdot 5$ ; between  $52^{\circ}$  and  $53^{\circ}$  of  $0^{\circ} \cdot 4$ ; and at stations north of this parallel of  $1^{\circ} \cdot 2$ .

From August to September there was an increase of  $0^{\circ} \cdot 3$  at stations south of  $51^{\circ}$ ; between  $51^{\circ}$  and  $52^{\circ}$  there was a decrease of  $0^{\circ} \cdot 1$ ; and at stations north of this parallel there was an increase of  $0^{\circ} \cdot 3$ .

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of July was  $29 \cdot 759$  ins., being  $0 \cdot 034$  in. below the average of 50 years; it was  $0 \cdot 024$  in. higher than in 1890, of the same value as that in 1889, and  $0 \cdot 159$  in. higher than in 1888.

The mean reading of the barometer for August was  $29 \cdot 646$  ins., being  $0 \cdot 137$  in. below the average of 50 years; it was  $0 \cdot 069$  in.,  $0 \cdot 064$  in., and  $0 \cdot 186$  in. lower than in 1890, 1889, and 1888 respectively.

The mean reading of the barometer for September was  $29 \cdot 834$  ins., being  $0 \cdot 028$  in. above the average of 50 years; it was  $0 \cdot 145$  in.,  $0 \cdot 031$  in., and  $0 \cdot 134$  in. lower than in 1890, 1889, and 1888 respectively.

From June to July there was a decrease of atmospheric pressure at all stations; at those south of  $51^{\circ}$  of  $0 \cdot 04$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0 \cdot 08$  in.; between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 10$  in.; and at stations north of this parallel of  $0 \cdot 15$  in.

From July to August there was a decrease at all stations; at those south of  $52^{\circ}$  of  $0 \cdot 12$  in.; between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 13$  in.; and at stations north of this parallel of  $0 \cdot 18$  in.

From August to September there was an increase at all stations, at those south of  $51^{\circ}$  of  $0 \cdot 17$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0 \cdot 18$  in., and at stations north of this parallel of  $0 \cdot 19$  in.

About London the atmospheric pressure was below its average till July 8th, the mean daily deficiency being  $0 \cdot 17$  in.; from the 9th to the 26th it was generally above, the mean daily excess being  $0 \cdot 05$  in.; from July 27th to September 7th it was generally below, being particularly so on the 21st and 27th of August, and on the 1st of September, when it was as much as  $0 \cdot 61$  in.,  $0 \cdot 55$  in., and  $0 \cdot 54$  in. respectively below; the mean daily deficiency for the 43 days ending September 7th being  $0 \cdot 15$  in.; and from September 8th to the 30th it was generally above, the mean daily excess for these 23 days being  $0 \cdot 04$  in.

*Thunderstorms occurred* in July on the 2nd at Halifax; on the 3rd at Torquay, Royston, and Cambridge; on the 6th at Blackheath, Royal Observatory, Royston, Cambridge, Hull, and Stonyhurst; on the 8th at Blackheath, Royal Observatory, Royston, and Cambridge; on the 17th at Royston, Cambridge, Halifax, and Leeds; on the 19th at Leeds; on the 21st at Rugby, Lowestoft, Halifax, Hull, and Leeds; on the 22nd at Oxford, Halifax, and Hull; on the 23rd at Cambridge; on the 26th at Guernsey; on the 27th at Torquay, Osborne, Salisbury, Blackheath, and Royal Observatory; on the 29th at Salisbury and Cambridge; and on the 30th at Salisbury, Blackheath, Royal Observatory, Lowestoft, and Somerleyton.

In August on the 2nd at Blackheath, Royal Observatory, Somerleyton, and Stonyhurst; on the 3rd at Salisbury, Oxford, Somerleyton, and Leeds; on the 4th at Torquay, Salisbury, Whitechurch, and Oxford; on the 5th at Torquay and Osborne; on the 10th at Osborne, Salisbury, Blackheath, Royal Observatory, Oxford, Somerleyton, and Halifax; on the 19th at Salisbury, Royston, and Somerleyton; on the 20th at Whitechurch; on the 21st at Torquay and Salisbury; on the 23rd at Osborne and Salisbury; on the 23rd at Somerleyton, Halifax, Hull, and Stonyhurst; and on the 29th at Liverpool and Leeds.

In September on the 14th at Torquay; on the 18th at Salisbury; and on the 22nd at Osborne, Salisbury, and Oxford.

*Thunder was heard but lightning was not seen* in July on 1st at Halifax; on the 3rd at Somerleyton; on the 4th at Somerleyton and Leeds; on the 6th at Oxford and Carlisle; on the 7th at Blackheath and Royal Observatory; on the 8th at Rugby and Stonyhurst; on the 17th at Blackheath, Royal Observatory, Rugby, Liverpool, and Stonyhurst; on the 19th at Blackheath, Royal Observatory, and Halifax; on the 20th at Truro; on the 21st at Somerleyton, Stonyhurst, and Carlisle; on the 22nd at Carlisle; on the 23rd at Somerleyton; on the 29th at Carlisle; on the 30th at Bath, Blackheath, Royal Observatory, Oxford, and Rugby; and on the 31st at Lowestoft and Somerleyton.

In August on the 2nd at Halifax; on the 3rd at Torquay, Bath, Whitechurch, Blackheath, Royal Observatory, Halifax, Hull, and Leeds; on the 4th at Bath, Blackheath, Royal Observatory, Oxford, Cambridge, Liverpool, Halifax, and Stonyhurst; on the 10th at Cambridge and Stonyhurst; on the 19th at Cambridge; on the 20th at Hull; on the 21st at Torquay, Oxford, and Stonyhurst; on the 28th at Leeds and Carlisle; on the 29th at Cambridge and Stonyhurst; and on the 31st at Hull.

In September on the 3rd at Royston and Llandudno; on the 13th at Hereford; on the 14th at Carlisle; on the 22nd at Blackheath and Royal Observatory; and on the 30th at Carlisle.

*Lightning was seen but thunder was not heard* in July on the 7th and 13th at Carlisle; on the 26th at Truro and Torquay; and on the 30th at Royston.

In August on the 2nd at Liverpool; on the 3rd at Oxford; and on the 27th and 28th at Liverpool.

In September on the 3rd at Torquay; on the 7th at Blackheath and Royal Observatory; and on the 13th at Torquay.

*Solar halos were seen* in July on the 7th and 12th at Oxford; on the 15th at Liverpool and Halifax; on the 16th at Torquay and Oxford; on the 18th at Torquay, Oxford, Liverpool, and Halifax; and on the 22nd at Liverpool.

In August on the 11th at Oxford; on the 15th and 22nd at Torquay; and on the 30th at Torquay and Oxford.

In September on the 1st and 2nd at Torquay; on the 3rd at Torquay and Halifax; on the 5th at Oxford, Liverpool, and Halifax; on the 13th at Torquay; on the 17th at Liverpool; on the 19th at Oxford and Halifax; on the 26th at Torquay, Osborne, Oxford, and Liverpool; and on the 27th at Torquay.

*Lunar halos were seen* in August on the 23rd at Stonyhurst.

In September on the 19th at Liverpool.

*Hail fell* in July on the 3rd and 8th at Cambridge; on the 23rd at Halifax; and on the 29th at Somerleyton and Carlisle.

In August on the 2nd at Somerleyton; on the 3rd at Torquay, Oxford, and Cambridge; on the 4th at Torquay; on the 10th at Whitechurch; and on the 28th and 29th at Hull.

In September on the 2nd at Stonyhurst; and on the 22nd at Oxford, Royston, and Cambridge.

*Fog prevailed* in July on the 1st and 5th at Guernsey and Torquay; on the 6th at Guernsey; on the 10th at Bath; on the 13th at Guernsey and Bath; on the 16th at Guernsey; on the 20th at Bath; on the 21st, 25th, and 26th at Guernsey; and on the 27th at Bath.

In August on the 13th, 14th, and 15th at Guernsey; and on the 20th at Torquay.

In September on the 3rd at Oxford; on the 7th at Torquay and Oxford; on the 12th and 13th at Halifax; on the 23rd at Bath; on the 24th at Torquay, Bath, and Cambridge; on the 25th at Torquay; and on the 30th at Cambridge.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									
Mean Reading of Maximum in Rays of Sun.														Mean Reading of Minimum on Grass.														Mean Estimated Strength.										Mean Weight of a cubic foot of Air.									

The highest temperatures of the air were at the Royal Observatory, 85° 1; at Camden Town, 84° 8; and at Royston, 83° 4.

The lowest temperatures of the air were at Barnet, 35° 0; and at Truro and Cambridge, 27° 0.

The greatest ranges of temperature were at Barnet, 47° 8; at Truro, 46° 0; and at Cambridge, 45° 3.

The least ranges of temperature were at Torquay, 29° 6; at Guernsey, 31° 0; and at Liverpool, 32° 3.

The greatest number of days of rain were at Stonyhurst, 64; at Nottingham, 61; and at Salisbury, 60.

The least number of days of rain were at Osborne, 40; at Llandudno, 43; and at Guernsey, 45.

The greatest falls of rain were at Stonyhurst, 18° 01 inches; at Bath, 15° 23 inches; and at Carlisle, 14° 74 inches.

The least falls of rain were at Nottingham, 6° 27 inches; at Llandudno, 6° 93 inches; and at Royston, 7° 06 inches.

#### QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.														WIND.										Mean Amount of Cloud.																																
	Mean of all Highest Readings of the Thermometer in the Quarter.														Relative Proportion of				Mean Amount of Ozone	Mean Number of Days on which it fell.

LONDON: Printed by EYRE and SPOTTISWOODE,  
Printers to the Queen's most Excellent Majesty.  
For Her Majesty's Stationery Office.  
[23.—2750.—10/91.]

QUARTERLY RETURN  
OF  
MARRIAGES, BIRTHS, AND DEATHS  
REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF  
ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,  
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 172.] **Marriages**—July, August, September, 1891.  
**Births and Deaths**—October, November, December, 1891. [Price 9d.

General Register Office, Somerset House,  
28th January, 1892.

The POPULATION of the UNITED KINGDOM in the middle of 1891 is estimated, on the basis of the recent enumerations, at 37,795,400 persons; that of England and Wales at 29,081,047, of Scotland at 4,033,180, and of Ireland at 4,681,173.

In the United Kingdom 275,964 *births* and 186,496 *deaths* were registered in the three months ending 31st December 1891. The natural increase of population was, therefore, 89,468. The registered number of persons married in the quarter ending 30th September 1891 was 139,850.

The birth-rate in the United Kingdom in the fourth quarter of 1891 was 29.0 and the death-rate 19.6 per 1000. The marriage-rate in the third quarter of 1891 was 14.7 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2123 registration sub-districts of England and Wales during the quarter ending 31st December 1891; and the MARRIAGES in 15,030 churches or chapels, in 10,728 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 30th September 1891.

*Marriages.*

During the three months ending with September last, the marriages of 117,106 persons were registered in England and Wales, giving an annual rate of 16.0 per 1000 of the estimated population. This is the highest rate recorded in the third quarter of any year since 1876, and is 7 per cent. above the mean rate in the corresponding periods of the ten years 1881-90. In registration counties the lowest rates were 10.4 in North Wales, 11.0 in Suffolk, 11.4 in Hertfordshire and in Huntingdonshire, and 11.6 in Norfolk; and the highest were 16.5 in Leicestershire and in South Wales, 17.5 in Warwickshire and in the West Riding of Yorkshire, 17.7 in Monmouthshire, and 18.2 in Lancashire. In Registration London the rate reached 19.9.

### *Births.*

The births registered during the three months ending 31st December numbered 220,969, and were in the proportion of 30·2 annually per 1000 living. This shows an increase of 2·1 per 1000 on the rate in the fourth quarter of 1890, but is lower than the rate in the corresponding period of any other year since 1847. In registration counties the rates varied from 22·8 in Rutlandshire, 23·8 in Sussex, 24·5 in North Wales, and 25·7 in Surrey, to 34·0 in South Wales, 34·6 in Staffordshire, 34·7 in Monmouthshire, and 36·0 in Durham.

In the twenty-eight great towns the birth-rate was 31·5 per 1000 living, and 1·3 per 1000 above that in the whole country. The lowest rates were 22·9 in Huddersfield, 24·1 in Brighton, and 25·3 in Halifax; while the rates in the other towns ranged upwards to 36·7 in Sheffield and 37·3 in Cardiff. In fifty other large town districts the birth-rate was 31·9 per 1000, or 0·4 per 1000 above the rate in the larger towns.

### *Excess of Births over Deaths, and Emigration.*

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 89,143, 85,453, and 57,678 respectively, in the fourth quarters of 1888, 1889, and 1890, was 79,426 last quarter.

It appears from returns issued by the Board of Trade that 60,298 emigrants (including 18,984 foreigners), embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionately 1448 whose nationality was not distinguished, the emigrants of native origin numbered 41,134, and of these 30,074 were English, 3938 Scotch, and 7122 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 1034 from England, 976 from Scotland, and 1521 from Ireland. Each of the proportions shows a considerable decrease when compared with the mean proportion in the corresponding quarters of the three years 1888-90.

### *Prices and Pauperism.*

During the three months ending December last the average price of wheat was 36s. 8d. per quarter, the average prices in the two preceding quarters having been 39s. 6d. and 38s. 11d. The mean wholesale prices of beef and mutton in the London market were 6d. and 7½d. per lb. respectively; the price of beef was the same as in the preceding quarter, while that of mutton showed a slight decrease. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 18s. 1d. per ton, against 19s. 5d. and 19s. 3d. in the fourth quarters of the preceding two years. The mean price of 2½l. per cent. Consols was 95l. os. 8d. The minimum annual rate per cent. of discount charged at the Bank of England, which had been raised from 2l. 10s. to 3l. on 24th September, was further raised to 4l. on 29th October, but was reduced to 3l. 10s. on 10th December. The average minimum rate per cent. charged during the quarter was 3·57l.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 653,845, of whom 179,495 received in-door, and 474,350 out-door relief. The proportion of the population in receipt of pauper relief was 22·5 per 1000, against 24·5 and 23·3 in the corresponding quarters of 1889 and 1890.

### *Meteorology.*

Remarks upon the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The

mean reading of the barometer was 29·694 inches, and was ·056 of an inch below the mean reading in the corresponding quarters of 50 years; the mean was below the average in October and November, but slightly above in December. The mean temperature of the air during the quarter was 45°·0, being 1°·4 above the average in the corresponding quarters of 120 years. The mean was above the average in each month of the quarter, the excess being 1°·4 in October, 0°·7 in November, and 2°·1 in December. The weather in October was generally mild, with high winds and heavy rain. The last two days of October and the early part of November were cold; there was a severe gale on the 11th of November, and from that day to the 20th the temperature was above its average; from the 21st to the end of the month it was generally colder. The weather during the first half of December was wet and mild, with a succession of gales from the 8th to the 13th; from the 19th to the 25th the mean temperature was 13½° below its average; from the 26th to the end of the year the temperature was above its average. At 28 stations of observation the mean temperature during the quarter ranged from 40°·8 at Wolverhampton, 41°·7 at Halifax, and 42°·3 at Stonyhurst, to 47°·1 at Barnstaple, 48°·7 at Truro, and 49°·0 in Guernsey.

The amount of rain measured during the quarter at the Royal Observatory, Greenwich, was 9·00 ins., being 1·95 ins. in excess of the average in the corresponding periods of 76 years. Compared with the respective monthly averages, the amount in October was 1·58 ins., and that in December 0·71 of an inch in excess, while in November there was a deficiency of 0·34 of an inch. At 28 stations of observation the amounts measured in the quarter ranged from 8·11 ins. at Lowestoft, 8·12 ins. at Somerleyton, and 8·97 ins. at Blackheath, to 18·80 ins. at Truro, 19·01 ins. at Salisbury, and 20·47 ins. at Torquay.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 177 hours, or 21 per cent. of the total number of hours the sun was above the horizon, the mean proportion in the fourth quarters of the ten years 1881-90 having been 16 per cent. The amount was above the average in October and in December, but below in November.

### *Deaths.*

During the three months ending 31st December 141,543 deaths were registered, being in the proportion of 19·3 deaths annually per 1000 persons living. This is slightly above the mean rate in the corresponding periods of the ten years 1881-90. In registration counties the rates ranged from 13·1 in Rutlandshire, 14·2 in Dorsetshire, 15·2 in Middlesex, and 15·3 in Huntingdonshire and in Bedfordshire, to 24·5 in Durham, 24·9 in Northumberland, 25·1 in South Wales, and 28·6 in Monmouthshire.

The 141,543 deaths included 72,032 of males, and 69,511 of females, the mean annual mortality of males being 20·3, and that of females 18·4, per 1000 estimated to be living of each sex; each of these rates was 0·2 per 1000 above the corresponding mean rate in the fourth quarters of the preceding ten years. Out of equal numbers living, the deaths of males were 110 to 100 of females, which had also been the mean proportion in the fourth quarters of the ten years 1881-90.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country (*see* Table III.), and contain a population estimated at more than eighteen and a half millions, the death-rate last quarter was 20·3 per 1000, while among the remaining and chiefly rural population of nearly ten and a half millions, it was 17·6 per 1000. These rates were respectively 0·2 below and 0·7 above the average rates in the fourth quarters of the ten years 1881-90. Out of equal numbers living the deaths in the urban districts were to those in the rural districts in the proportion of 115 to 100, the mean proportion in the fourth quarters of the preceding ten years having been 121 to 100.

In the twenty-eight great towns (*see* Tables V. and VI.), with an aggregate population estimated at nearly nine and a half millions, the annual death-rate last quarter was 21·2 per 1000, or 0·9 per 1000 above the general urban rate, and 0·3 per 1000 below the average rate in these towns in the fourth quarters of the preceding nine years. The lowest rates were 16·1 in Huddersfield, 16·4 in Portsmouth and in Leicester, and 16·9 in Halifax; while the highest were 28·2 in Wolverhampton, 28·8 in Newcastle-on-Tyne, and 28·9 in Sunderland. In Registration London the rate was 20·5.

In fifty other large town districts, with an aggregate population of about three millions, the death-rate last quarter was 21·7 per 1000, or 0·5 per 1000 above the rate in the larger towns, and 2·4 per 1000 above the general rate in the whole country.

**MORTALITY AT DIFFERENT AGES.**—Of the 141,543 deaths registered last quarter, 35,178 were of infants under one year of age, 66,137 of persons aged between one and 60 years, and 40,228 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 159 deaths to 1000 births registered, being 16 per 1000 above the mean proportion in the fourth quarters of the ten years, 1881–90. The lowest proportions in registration counties were 80 in Dorsetshire, 87 in Rutlandshire, 100 in Hertfordshire, and 101 in Cambridgeshire; while the highest were 195 in Durham, 211 in South Wales, and 221 in Monmouthshire. In the twenty-eight great towns the mean proportion was 171 per 1000, or 12 per 1000 in excess of the general English rate; the proportions ranging from 132 in Birkenhead, 137 in Portsmouth, 141 in Huddersfield, and 144 in Sheffield, to 204 in Sunderland and in Cardiff, 206 in Norwich, and 229 in Wolverhampton. In fifty other large town districts the infant mortality averaged 186 per 1000 births, the proportions ranging from 100 in Colchester, 104 in Hastings, and 105 in Bath, to 231 in Warrington, 242 in Newport (Monmouthshire), 280 in Merthyr Tydfil, and 306 in Ystradyfodwg.

The mortality of persons aged between one and 60 years was in the proportion of 10·0 deaths annually per 1000 of the estimated number living at these ages, being 0·5 per 1000 below the average rate in the corresponding quarters of the ten years, 1881–90. In the twenty-eight great towns the rate was 12·1 per 1000; the lowest rates being 7·8 in Leicester, 8·2 in Portsmouth, 9·0 in Brighton, 9·2 in Huddersfield, and 9·4 in Nottingham, and the highest 16·4 in Liverpool, 16·5 in Sunderland, 16·9 in Wolverhampton, and 17·2 in Newcastle-on-Tyne.

Among persons aged 60 years and upwards the mortality was at the rate of 74·5 annually per 1000 persons living at these ages, and exceeded by 3·8 per 1000 the average rate in the fourth quarters of the ten years 1881–90. In the twenty-eight great towns the rate was 80·7 per 1000, ranging from 60·3 in Hull, 62·9 in Derby, 64·3 in Leicester, and 64·9 in Norwich, to 106·1 in Plymouth, 110·8 in Newcastle-upon-Tyne, and 114·7 in Sunderland.

Compared with the respective average rates in the fourth quarters of the ten years 1881–90, the mortality of infants under one year of age showed an excess of 11 per cent., and that of persons aged 60 years and upwards an excess of 5 per cent., while that of persons between one and 60 years of age was 5 per cent. below its average.

**ZYMOTIC DISEASES.**—The 141,543 deaths from all causes included—

3201	attributed to whooping-cough,
3151	„ diarrhoea,
3130	„ measles,
1816	„ fever,
1505	„ diphtheria,
1382	„ scarlet fever,
19	„ small-pox.

Thus 14,204 deaths were ascribed to these chief zymotic diseases, corresponding to an annual rate of 1·94 per 1000 persons living, the average annual rate in the ten preceding fourth quarters having been 2·17. Whilst, however, the rate was below 1·00 per 1000 in Sussex, Oxfordshire, Huntingdonshire, Bedfordshire, Dorsetshire, Somersetshire, Herefordshire, Shropshire, Rutlandshire, and Westmorland, it was 2·65 in Lancashire, 2·75 in Durham, 2·80 in South Wales, 3·23 in Northumberland, and 3·92 in Monmouthshire. In the twenty-eight great towns the rate was 2·39, rising, however, to 3·58 in Wolverhampton, 3·88 in Cardiff, 4·40 in Sunderland, and 4·51 in Newcastle-on-Tyne. In fifty other considerable town districts the rate was 2·50; while in the remaining, and mainly rural, part of England and Wales, it was 1·59.

The deaths from *whooping-cough* numbered 3201 or 0·44 annually per 1000 living, a rate not only one third above the average for the ten preceding fourth quarters, but higher than in any one of those ten quarters. The rate did not reach 0·10 per 1000 in Huntingdonshire, Wiltshire, Dorsetshire, Somersetshire, or Herefordshire, while it was 0·66 in South Wales, 0·68 in Hertfordshire, and 0·81 in Northumberland. In the twenty-eight great towns the rate was 0·65, rising, however, to 1·06 in Bradford, 1·08 in Cardiff, 1·17 in Blackburn, and 1·28 in Newcastle-on-Tyne. In fifty other considerable urban districts the rate was 0·33, while in the remainder of the country it was 0·34. Among districts and sub-districts in which this disease seems to have been especially prevalent were Kilhampton, Ibstock, Middlewich, Lofthouse, Hexham, Margam, and Neath.

The 3151 deaths from *diarrhœa* corresponded to an annual mortality of 0·42 per 1000, the average rate in the ten preceding fourth quarters having been 0·42. The highest rates in registration counties were 0·69 in Lancashire, 0·72 in Durham, and 0·80 in Staffordshire.

The 3130 deaths from *measles* corresponded to an annual rate of 0·43 per 1000, the average rate in the ten preceding fourth quarters having been 0·48. The rate did not exceed 0·05 per 1000 in Sussex, Hertfordshire, Oxfordshire, Bedfordshire, Suffolk, or Dorsetshire, while it was 1·01 in Northumberland, 1·06 in Durham, and 1·78 in Monmouthshire. In the twenty-eight great towns the rate was 0·53, rising, however, to 2·01 in Newcastle-on-Tyne and 2·20 in Sunderland; in fifty other considerable urban districts it was 0·70; while in the remainder of England and Wales it was 0·32. Among districts and sub-districts in which the mortality from this disease was excessive were East Maidstone, Duxford, Braintree, Exeter, Newton Abbot, Tewkesbury, Newcastle-under-Lyme, Ibstock, Runcorn, Barton, (Barton-upon-Irwell), Whitehaven, Abergavenny, Blaenavon, Llangafelach, and Ruabon.

To *fever*, including typhus, enteric, and simple or ill-defined forms of continued fever, were ascribed 1816 deaths, or 0·25 annually per 1000, the average rate in the ten preceding fourth quarters having been 0·29. In registration counties the rate did not reach 0·10 per 1000 in Kent, Hertfordshire, Buckinghamshire, Huntingdonshire, Bedfordshire, Wiltshire, Somersetshire, or Herefordshire; while it was 0·40 in Cheshire, 0·44 in Lancashire and in Leicestershire, and 0·49 in Northumberland. In the twenty-eight great towns the rate was 0·30, but reached 0·60 in Nottingham and in Birkenhead, 0·79 in Salford, 0·89 in Preston, and 0·92 in Sunderland; in fifty other considerable urban districts the rate was 0·40; while in the remainder of England and Wales it was 0·19. Among districts or sub-districts in which the mortality from fever was in excess were Gorleston, Burton-upon-Trent, Ashby-de-la-Zouch, Whitwick, Wallasey, Rotherham, Kimberworth, and Blyth.

The deaths attributed to *diphtheria* numbered 1505, being in the proportion of 0·21 annually per 1000 living, which slightly exceeded the average rate in the ten preceding fourth quarters. The rate was under 0·10 in Dorsetshire, Somersetshire, Worcestershire, Warwickshire, Rutlandshire, Lincolnshire, Nottinghamshire, and Cheshire, while it was 0·37 in Norfolk and in Monmouthshire, 0·43 in Buckinghamshire, 0·48 in Essex, and 0·54 in Westmorland. In the twenty-eight

great towns the rate was 0·23 ; but, while no deaths from this disease were registered in Blackburn or Halifax, and only one in Wolverhampton, the rate was 0·35 in London, 0·39 in Newcastle-on-Tyne, and 0·42 in Derby. In fifty other considerable urban districts the rate was 0·20 ; while in the remainder of England and Wales it was 0·19. Among districts or sub-districts in which the mortality from this disease was in excess were Esher, Cookham, Tring, Waddesdon, Thetford, Calne, South Hamlet, Stroud, Heywood, Lowther, and Llandwrog.

The 1382 deaths from *scarlet fever* corresponded to an annual rate of 0·19 per 1000 living, which was not only less than half the average rate for the ten preceding fourth quarters, which had been 0·42, but far below the rate in any one of those quarters, the lowest of these having been 0·27. No deaths from this disease were recorded in the counties of Huntingdon, Cambridge, Rutland, or Westmorland, and only one in Oxfordshire, while the only high rates were 0·55 in South Wales and 0·91 in Monmouthshire. In the twenty-eight great towns the rate was 0·19, or the same as in the whole country, but in Cardiff it was as high as 0·77. In fifty other considerable urban districts the rate was 0·22, while in the remainder of England and Wales it was 0·18. Among districts and sub-districts in which the mortality from this disease was excessive were Greasley, Tideswell, Barmbrough, Aberystroth, Tredegar, and Aberdare.

The deaths from *small-pox* were 19, of which 5 were registered in Birmingham, one in Liverpool, 11 in the registration district of Dewsbury, and one each in the registration districts of Wakefield and Southampton.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the twenty-eight great towns, in fifty other considerable urban districts, and in the remainder of the country :—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the Fourth Quarter of 1891.

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.	9.
England and Wales -	19·3	1·94	0·00	0·43	0·19	0·21	0·44	0·25	0·42
28 Great Towns -	21·2	2·39	0·00	0·53	0·19	0·23	0·65	0·30	0·40

England and Wales, } less the 78 Towns - }	17·9	1·59	0·00	0·32	0·18	0·19	0·34	0·19	0·37

CERTIFICATION OF CAUSES OF DEATH.—Of the 141,543 deaths in England and Wales, the causes of 129,422, or 91·5 per cent., were duly certified by registered medical practitioners, and of 8096, or 5·7 per cent., by coroners after inquest, while the causes of the remaining 4025, or 2·8 per cent., were not certified. While, however, the proportion per cent. of uncertified deaths was only 0·7 in Middlesex, 1·1 in London, and 1·3 in Wiltshire, it ranged upwards in the other counties to 6·2 in Huntingdonshire and in Herefordshire. In North Wales the proportion was 5·5 per cent., and in South Wales, 4·0 per cent. In the twenty-eight great towns the proportion was 2·1 per cent., varying from 0·4 in Plymouth and in Birkenhead, and 0·7 in Wolverhampton and in Derby, to 5·7 in Sheffield, 7·1 in Halifax, and 7·8 in Huddersfield.

VIOLENT DEATHS.—To different forms of violence 4623 deaths were ascribed, corresponding to an annual rate of 0·63 per 1000, the average rate in the ten

preceding fourth quarters having been 0·61. In registration counties the rates ranged from 0·26 in Cornwall, 0·32 in Huntingdonshire, and 0·34 in Cambridgeshire, to 0·81 in Lancashire, 0·85 in Northumberland and in Cumberland, and 0·88 in South Wales. In the twenty-eight great towns the rate was 0·81, varying from 0·38 in Brighton, 0·47 in Derby, 0·50 in Bradford, and 0·51 in Norwich and in Leicester, to 1·00 in Manchester, 1·07 in Newcastle-on-Tyne, and 1·59 in Liverpool.

**INQUESTS.**—Inquests were held concerning 8096, or 5·7 per cent. of the total deaths, against a mean proportion of 5·5 in the ten preceding fourth quarters. In the twenty-eight great towns the proportion of inquests to total deaths was 7·2 per cent., ranging from 3·4 in Preston, 3·8 in Brighton, and 4·0 in Halifax, to 8·6 in Leicester, 8·7 in Plymouth, and 9·0 in Bolton.

**DEATHS IN PUBLIC INSTITUTIONS.**—Of the total deaths registered in England and Wales, 15,644, or 11·1 per cent., occurred in workhouses, hospitals, and public lunatic asylums, against a mean proportion of 10·7 per cent. in the ten preceding fourth quarters. In the twenty-eight great towns the proportion of deaths in such institutions was 17·8 per cent., ranging from 6·7 in Preston, 7·7 in Sunderland, and 8·1 in Bolton, to 20·8 in Brighton, and 23·7 in London.

### HEALTH OF COLONIAL AND FOREIGN CITIES.

A summary of the Weekly Returns, with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in twenty-eight Colonial and Foreign cities, with an aggregate population of nearly seventeen millions, were equal to an annual rate of 25·2 per 1000 living.

In the twenty European cities the mean death-rate per 1000 was 23·0, against 21·2 in the twenty-eight great English towns. In Paris the rate was 20·5 per 1000, in Berlin 23·1, and in Vienna 22·4, the rate in London being 20·5. Among the twenty-eight Colonial and Foreign cities the lowest death-rates were 17·7 in Christiania, 18·4 in Turin, 19·2 in Amsterdam and in the Hague, and 19·3 in Dresden; while the highest were 34·1 in Trieste, 36·4 in Alexandria, 41·9 in Cairo, and 81·6 in Madras. *Small-pox* caused 61 deaths in Prague, 24 in Bombay, 20 in Alexandria, 15 in Vienna, and 11 in Cairo. The mortality from *measles* was proportionally highest in Brussels, Christiania, and Trieste; from *scarlet fever* in Stockholm, Buda-Pesth, and New York; from *diphtheria* in Copenhagen, Stockholm, Dresden, Breslau, Munich, Vienna, Buda-Pesth, Trieste, New York, and Philadelphia; and from *whooping-cough* in the Hague and Christiania. The mortality from “*fever*” showed a marked excess in Rome, and in the Indian and African cities, and that from “*diarrhoeal diseases*” in the Indian and African cities, and in Berlin, Hamburg, Breslau, Munich, and Buda-Pesth.

---

### The Year 1891.

According to the quarterly returns furnished by the local Registrars, 913,836 births and 587,666 deaths were registered in England and Wales during the year 1891. The natural increase of population, by excess of births over deaths, was thus 326,170, against an average increase in the previous five years of 353,247. The returns issued by the Board of Trade show that 334,451 emigrants (including 112,435 foreigners) embarked during the year from the various ports in the United Kingdom at which emigration officers are stationed. Distributing proportionately 3753 whose nationality was not stated, the emigrants of native origin numbered 221,436, of whom 140,353 were English, 22,516 Scotch, and 58,567 Irish. Compared with the figures for 1890 the total number of native emigrants remained practically stationary, slight increases in the number of Scotch and Irish being nearly balanced by a decrease in the number of English emigrants.

The birth-rate in England and Wales during the year was 31·4 per 1000 living, a rate 1·2 per 1000 higher than that in 1890, which was the lowest on record, and just equal to the mean rate in the five years 1886-90.

The death-rate, which in the ten consecutive years 1881-90, had not risen above 19·7 per 1000, and had averaged 19·1, rose last year to 20·2, which is, however, lower than the rate recorded in any year prior to 1881.

Of the 587,666 deaths registered last year, 135,998 were of infants under one year of age, 276,577 of persons aged between one and 60 years, and 175,091 of persons aged 60 years and upwards. The proportion of deaths under one year of age to registered births was 149 per 1000, the mean proportion in the preceding ten years having been 142. The death-rate among persons aged between one and 60 years was 10·6 per 1000 estimated to be living, against 9·7 and 10·6 in 1889 and 1890; while that among persons age 60 years and upwards was 81·6 per 1000, against 68·1 and 75·3 in 1889 and 1890.

The deaths in 1891 included 13,062 from diarrhœa, 12,920 from whooping-cough, 12,287 from measles, 5,119 from "fever," 4,940 from diphtheria, 4,845 from scarlet fever, and only 48 from small-pox. Thus 53,221 deaths were attributed to these zymotic diseases, corresponding to a rate of 1·83 per 1000 living, against 1·86, 2·22, and 2·14 in the immediately preceding three years.

Inquests were held in 32,432 cases, or 5·5 per cent. of the total deaths; and in 16,153 cases, or 2·7 per cent. of the total, the causes were not certified either by registered medical practitioners or by coroners. Both these proportions are somewhat lower than the corresponding figures in recent years.

To different forms of violence 18,591 deaths were referred, being at the rate of 0·64 per 1000 living, against 0·61 and 0·65 in the preceding two years.

The foregoing statistics for the year 1891 are derived from returns furnished quarterly by the local registrars, and are therefore subject to revision when the causes of death and other details shall have been finally classified and tabulated for publication in the Registrar General's Fifty-fourth Annual Report, now in course of preparation.

---

PRELIMINARY TABLES.

---

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1881-91**, and in each Quarter of those Years.

YEAR	1881	1882	1883	1884	1885	1886	1887	1888	1889	1890	1891
Marriages	197,290	204,405	206,384	204,301	197,745	196,071	200,518	203,821	213,865	223,028	—
Births	883,642	889,014	890,722	906,750	894,270	903,760	886,331	879,868	885,944	869,937	913,836
Deaths	491,935	516,654	522,997	530,828	522,750	537,276	530,758	510,971	518,353	562,248	587,666

\* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

\* The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Principal Towns. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore may or may not coincide with the boundaries of Geographical Counties.

† The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

‡ See page 14.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions in the foot notes.

\* The Registration Districts, 639 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

\* These Areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

\* See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—REGISTRATION DISTRICTS—continued.

Registration Districts.	Area in Statute Acres.	Enumerated Population, 1891 (unrevised).	Mar-riages Registered in Quarter ending 30 Sept. 1891.	Births Registered in Quarter ending 31 Dec. 1891. \* The Registration Sub-districts (2123 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates Workhouse Establishment receiving inmates from other Districts (the one in which it stands; H indicates Hospital or Infirmary; and L Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the two subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 2nd January 1892.

206 : 1.—Of the 11 deaths from diphtheria, 3 were registered in October and 8 in November.  
 208 : 3.—The 4 deaths from diphtheria occurred in one family in the parish of Harleston.  
 214 : 2.—The 6 deaths from diphtheria occurred in the parish of Walton.  
 \* Owing to recent changes of boundary the separate averages for the sub-districts of Lowestoft, Belton, and Gorleston cannot be shown.  
 number bracketed against Lowestoft and Belton is the average for the three sub-districts named.

a 510: 1.—The number of deaths from measles in the sub-district was 11 and not 8 as first reported by the Registrar: the correction arrived too late to be embodied in the Tables. Of the 11 deaths, 7 occurred in the parish of Aston and 4 in the parish of Beighton.

b 510: 2.—Of the 16 deaths from fever (typhoid or enteric), 15 occurred in Rotherham Urban Sanitary District.

c 510: 3.—Of the 21 deaths from fever (typhoid or enteric), 14 occurred in Rawmarsh Urban Sanitary District and 7 in the parish of Kimberworth in the Rural Sanitary District.

d 510: 4.—Of the 8 deaths from measles 4 occurred in Swinton and 4 in Wath Urban Sanitary Districts.

e 511: 2.—Of the 17 deaths from scarlet fever (9 of which were registered in December), 16 occurred in Mexborough Urban Sanitary District.

a 618: 2.—The 44 deaths from measles occurred in the parish of Ruabon.

b 624: 2.—The 8 deaths from scarlet fever occurred in Dolgelly Urban Sanitary District.

c 625: 2.—The 6 deaths from measles occurred in Festiniog Urban Sanitary District.

d 627: 1.—The 18 deaths from diphtheria occurred in the parishes of Llanfyllai and Llandwrog.

# METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING DECEMBER 31ST, 1891.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in October was mild and very wet, with frequent high wind. The temperature of the air was for a few days together a little above the average, and then for a few days a little below, till the last two days which were very cold. The atmospheric pressure was low from the 6th to the 26th, particularly so on the 13th, 21st, and 22nd, on the 13th the readings were lowest at the northern stations, and were below 28·5 inches. About London the lowest readings were about 29 inches. There was a very heavy gale of wind on the 13th and 14th, many ships were wrecked, trees were blown down, and some lives were lost. The fall of rain was heavy, causing floods in many places. At about London the rainfall was about 4½ inches in depth, at Greenwich it was 4·3 inches; back to 1815, the instances in October of a rainfall as heavy are as follows:—

	in.		in.		in.
1882 it was	5·4	1855 it was	4·9	1841 it was	6·0
1880 "	7·7	1853 "	4·3	1831 "	5·5
1872 "	4·3	1846 "	5·1	1827 "	4·4
1865 "	6·0	1843 "	4·3	1823 "	4·4

The floods in several parts of the country have caused great inconvenience, wheat sowing on heavy lands was stopped.

The weather in November was cold during the first week, and from the 23rd, with a fall of rain below the average at most stations, and foggy at many places. The temperature of the air was above its average from the 11th to the 20th, and generally below on all other days. The atmospheric pressure was above its average till the 8th, and generally below from the 9th, particularly so on the 11th. The reading at Blackheath at 11 a.m. on this day was 28·27 inches; this was followed by a very severe gale, which continued for seven or eight hours, uprooting many trees. The fall of rain was less than the average, and fog was prevalent, particularly in the midland counties.

The weather in December during the first half of the month was wet and mild. The temperature of the air was above its average till the 16th, and from the 26th; and below it from the 17th to the 25th, and particularly so from the 19th to the 25th; the average deficiency of mean daily temperature for the seven days, from the 19th to the 25th, was 13½°. The atmospheric pressure was generally below its average till the 16th and from the 23th, and particularly so on the 10th and 13th. There were a succession of gales from the 8th to the 13th, that of the 10th was the most severe, when many trees were uprooted. The rain-fall was above the average, thus causing all low lying lands to be very wet, and greatly checking agricultural operations.

About London the mean daily temperature of the air was generally below its average of 60 years from October 1st to the 10th of November, being particularly so on the 30th and 31st of October, when it was as much as 7·5 and 9·6 respectively below its average, the mean daily deficiency for these 41 days being 0·6°; from November 11th to the 20th it was above, particularly so on the 19th, when it was as much as 11·2 above, the mean daily excess being 3° 5; from November 21st to the 30th it was below, the mean daily deficiency being 4° 1; from December 1st to the 16th it was generally above, being particularly so on the 4th, 5th, and 10th, when it was as much as 10·8, 10°, and 8·4 respectively above; the mean daily excess for the 16 days ending December 16th being 4° 1; from December 17th to the 25th it was below, being particularly so from the 19th to the 25th, when it was as much as 12·6, 13°, 13·6, 16·2, 13·9, 14·1, and 11·1 respectively below its average; the mean daily deficiency for the nine days ending December 25th being 11·8; and from December 26th to the 31st it was above, being as much as 9·1, 10·7, and 12·5 respectively above its average on the 29th, 30th, and 31st days; the mean daily excess for the six days being 6·4.

The mean temperature of the air for October was 50°·9, being 1°·4 and 1°·2 above the average of 150 and 50 years respectively; it was 1°·6, 2°·3, and 4°·9 higher than in 1890, 1889, and 1888 respectively.

The mean temperature of the air for November was 43°·1, being 0°·7 above the average of 150 years; and 0°·4 below the average of 50 years; it was 0°·1, 1°·2, and 3°·9 lower than in 1890, 1889, and 1888 respectively.

The mean temperature of the air for December was 41°·1, being 2°·1 and 1°·5 above the average of 150 and 50 years respectively; it was 11°·3, 3°·5, and 0°·3 higher than in 1890, 1889, and 1888 respectively.

The mean high day temperature of the air for October was 58·8, being 1° above the average of 50 years; it was 1°·3, 2°·4, and 3°·6 higher than in 1890, 1889, and 1888 respectively.

The mean high day temperature of the air for November was 48°·2, being 0°·6 below the average of 50 years; it was 1°·1, 1°·5, and 3°·3 lower than in 1890, 1889, and 1888 respectively.

The mean high day temperature of the air for December was 46°·5, being 2°·2 above the average of 50 years; it was 13°·2, 4°·8, and 0°·9 higher than in 1890, 1889, and 1888 respectively.

The mean low night temperature of the air for October was  $44^{\circ}\cdot 0$ , being  $0^{\circ}\cdot 8$  above the average of 50 years; it was  $2^{\circ}\cdot 2$ ,  $1^{\circ}\cdot 8$ , and  $6^{\circ}\cdot 3$  higher than in 1890, 1889, and 1888 respectively.

The mean low night temperature of the air for November was  $37^{\circ}\cdot 7$ , being  $0^{\circ}\cdot 1$  above the average of 50 years; it was  $0^{\circ}\cdot 5$  higher than in 1890, and  $1^{\circ}\cdot 1$  and  $5^{\circ}\cdot 0$  lower than in 1889 and 1888 respectively.

The mean low night temperature of the air for December was  $35^{\circ}\cdot 4$ , being  $0^{\circ}\cdot 6$  above the average of 50 years; it was  $10^{\circ}\cdot 2$  and  $2^{\circ}\cdot 9$  higher than in 1890 and 1889 respectively, and  $0^{\circ}\cdot 2$  lower than in 1888.

The mean daily range for October was  $14^{\circ}\cdot 8$ , being  $0^{\circ}\cdot 2$  larger than the average; in November it was  $10^{\circ}\cdot 5$ , being  $0^{\circ}\cdot 9$  smaller than the average; and in December it was  $11^{\circ}\cdot 1$ , being  $1^{\circ}\cdot 8$  larger than the average.

The mean temperature of the air for October was  $8^{\circ}\cdot 2$  colder than in September; in November it was  $7^{\circ}\cdot 8$  colder than in October; and in December it was  $2^{\circ}$  colder than in November.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (−) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	OCTOBER.			NOVEMBER.			DECEMBER.		
	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.	1891.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	1	2½	- 1½	3	2½	+ ½	2	2½	- ½
N.	2	3½	- 1½	3	4½	- 1½	1	3	- 2
N.E.	6	3	+ 3	7	4	+ 3	4	2½	+ 1½
E.	2	1½	+ ½	1	2½	- 1½	3	2	+ 1
S.E.	4	2	+ 2	7	2½	+ 4½	4	2	+ 2
S.	6	4	+ 2	4	4	0	3	3½	- ½
S.W.	9	10	- 1	4	8½	- 4½	13	11	+ 2
W.	1	4½	- 3½	1	2½	- 1½	1	4½	- 3½

The sign (+) denotes excesses over averages; the numbers affected by this sign in October are N.E., S.E., and S.; in November are S.E., N.E., and N.W.; and in December are S.W., S.E., N.E., and E.

The sign (−) denotes deficiencies below averages; the numbers affected by this sign in October are W., N., and N.W.; in November are S.W., W., N., and E.; and in December are W. and N.

(From the preceding 50 years' observations the decrease from September to October is  $7^{\circ} \cdot 3$ , from October to November the decrease is  $6^{\circ} \cdot 2$ , and from November to December the decrease is  $3^{\circ} \cdot 9$ .)

From September to October there was a decrease of temperature at stations south of  $51^{\circ}$  of  $6^{\circ} \cdot 3$ ; between  $51^{\circ}$  and  $53^{\circ}$  of  $7^{\circ} \cdot 8$ ; and at stations south of this parallel of  $8^{\circ} \cdot 4$ .

From October to November there was a decrease of  $6^{\circ} \cdot 9$  at stations south of  $52^{\circ}$ ; between  $52^{\circ}$  and  $53^{\circ}$  of  $7^{\circ} \cdot 7$ ; and at stations north of this parallel of  $6^{\circ} \cdot 6$ .

From November to December there was a decrease of  $0^{\circ} \cdot 5$  at stations south of  $51^{\circ}$ ; between  $51^{\circ}$  and  $52^{\circ}$  of  $2^{\circ} \cdot 3$ ; between  $52^{\circ}$  and  $53^{\circ}$  of  $2^{\circ} \cdot 7$ ; and at stations north of this parallel of  $2^{\circ} \cdot 3$ .

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of October was 29.608 ins., being  $0 \cdot 108$  in. below the average of 50 years; it was  $0 \cdot 313$  in. lower than in 1890,  $0^{\circ} \cdot 087$  in. higher than in 1889, and  $0 \cdot 280$  in. lower than in 1888.

The mean reading of the barometer for November was 29.670 ins., being  $0 \cdot 071$  in. below the average of 50 years; it was  $0 \cdot 031$  in. and  $0 \cdot 373$  in. lower than in 1890 and 1889 respectively; and  $0 \cdot 046$  in. higher than in 1888.

The mean reading of the barometer for December was 29.804 ins., being  $0 \cdot 011$  in. above the average of 50 years; it was  $0 \cdot 047$  in.,  $0 \cdot 206$  in., and  $0 \cdot 005$  in. lower than in 1890, 1889, and 1888 respectively.

From September to October there was a decrease of atmospheric pressure at all stations of about  $0 \cdot 23$  in.

From October to November there was an increase at all stations; at those south of  $52^{\circ}$  of  $0 \cdot 08$  in.; between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 09$  in.; and at stations north of this parallel of  $0 \cdot 13$  in.

From November to December there was an increase at all stations; at those south of  $51^{\circ}$  of  $0 \cdot 18$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0 \cdot 13$  in.; between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 08$  in.; and at stations north of this parallel of  $0 \cdot 04$  in.

About London the atmospheric pressure was above its average till the 5th of October, with the exception of the 1st, which was below, the mean daily excess being  $0 \cdot 10$  in.; from October 6th to the 26th it was below, being particularly so on the 13th, 21st, and 22nd days, when it was as much as  $0 \cdot 54$  in.,  $0 \cdot 65$  in., and  $0 \cdot 72$  in. respectively below; the mean daily deficiency for the 21 days being  $0 \cdot 24$  in.; from October 27th to November 8th it was above, being particularly so on the 30th and 31st of October and the 1st, 2nd, and 5th of November, when it was more than  $\frac{1}{2}$  an inch above on all these days, the mean daily excess for these 13 days being  $0 \cdot 44$  in.; from November 9th to December 16th it was generally below, being particularly so on the 11th of November, when it was as much as  $1 \cdot 30$  in. below, while on the 13th, 14th, and 15th of November, and 10th and 13th of December, it was as much as  $0 \cdot 85$  in.,  $0 \cdot 67$  in.,  $0 \cdot 78$  in.,  $0 \cdot 77$  in., and  $0 \cdot 80$  in. respectively below, the mean daily deficiency for the 38 days ending December 16th being  $0 \cdot 24$  in.; from the 17th to the 24th it was above, being on several days more than  $\frac{1}{2}$  an inch above, the mean daily excess for the 8 days being  $0 \cdot 51$  in.; and from the 25th to the 31st it was below, the mean daily deficiency being  $0 \cdot 27$  in.

*Thunderstorms occurred* in October on the 2nd at Lowestoft and Somerleyton; on the 8th at Barnet, Lowestoft, and Somerleyton; on the 12th at Halifax; on the 13th at Whitechurch; on the 14th at Guernsey, Truro, Torquay, Bath, Oxford, Royston, Hereford, Cambridge, Halifax, Leeds, and Stonyhurst; on the 15th at Bath, Royston, Cambridge, and Somerleyton; and on the 21st at Torquay.

In November on the 10th at Salisbury; and on the 15th at Torquay.

In December on the 9th at Hereford; on the 11th at Truro and Torquay; on the 13th at Torquay and Osborne; on the 27th at Halifax and Stonyhurst; and on the 29th at Halifax.

*Thunder was heard but lightning was not seen* in October on the 7th at Whitechurch and Royston; on the 12th at Royston and Stonyhurst; on the 14th at Llandudno; on the 15th at Blackheath, Royal Observatory, Royston, Lowestoft, and Hull; on the 18th at Halifax; and on the 20th and 21st at Carlisle.

In December on the 28th at Halifax.

*Lightning was seen but thunder was not heard* in October on the 6th at Torquay; on the 7th at Blackheath, Royal Observatory, and Oxford; on the 15th at Liverpool; on the 17th at Stonyhurst; and on the 20th at Liverpool.

In November on the 9th at Liverpool; and on the 15th at Torquay.

In December on the 8th and 11th at Halifax; on the 12th and 15th at Torquay; on the 28th at Osborne; and on the 30th at Blackheath, Royal Observatory, and Halifax.

*Solar halos were seen* in October on the 3rd at Oxford; on the 4th at Torquay; on the 7th at Torquay and Oxford; on the 8th at Halifax; on the 18th at Torquay and Halifax; and on the 22nd at Liverpool and Halifax.

In November on the 9th at Liverpool; on the 10th at Torquay and Whitechurch; on the 11th and 16th at Torquay; on the 20th at Oxford; on the 25th at Halifax; and on the 27th at Torquay.

In December on the 2nd and 4th at Torquay; on the 5th at Oxford and Halifax; on the 6th at Torquay and Oxford; on the 8th at Torquay; on the 9th at Liverpool; on the 14th at Torquay and Oxford; and on the 26th and 28th at Halifax.

*Lunar halos were seen* in October on the 15th at Stonyhurst; on the 16th at Torquay, Oxford, and Cambridge; on the 18th at Cambridge; on the 19th at Torquay, Oxford, and Cambridge; and on the 20th at Cambridge.

In November on the 10th and 11th at Cambridge; on the 13th at Stonyhurst; on the 14th at Oxford and Stonyhurst; on the 15th and 16th at Torquay; on the 17th at Oxford, Royston, Liverpool, Halifax, and Stonyhurst; and on the 18th at Halifax.

In December on the 8th at Oxford; on the 11th and 12th at Torquay; on the 14th at Liverpool, Halifax, and Stonyhurst; on the 17th at Liverpool; on the 18th at Oxford; and on the 19th at Torquay.

*Snow fell* in November on the 25th at Liverpool and Leeds; and on the 26th at Liverpool, Halifax, and Stonyhurst.

In December on the 6th at Halifax; on the 7th at Carlisle; on the 11th at Royston, Liverpool, Halifax, Leeds, and Stonyhurst; on the 12th at Hereford, Liverpool, Halifax, Stonyhurst, and Carlisle; on the 25th at Carlisle; and on the 28th at Halifax and Carlisle.

*Hail fell* in October on the 2nd at Cambridge; on the 8th at Lowestoft; on the 13th at Whitechurch; on the 14th at Guernsey, Truro, Torquay, Osborne, Bath, Oxford, Royston, Cambridge, and Hull; on the 15th at Torquay, Osborne, Bath, Cambridge, and Carlisle; and on the 17th and 21st at Torquay.

In November on the 9th at Truro, Stonyhurst, and Carlisle; on the 10th at Carlisle; on the 11th at Truro, Liverpool, and Halifax; on the 12th at Torquay and Hereford; on the 13th at Torquay, Osborne, and Salisbury; on the 17th at Liverpool; on the 21st at Truro; and on the 26th at Liverpool and Stonyhurst.

In December on the 7th at Torquay, Osborne, Salisbury, and Oxford; on the 10th at Liverpool and Carlisle; on the 11th at Truro, Torquay, Osborne, Royston, Hereford, Liverpool, and Stonyhurst; on the 13th at Truro, Torquay, and Salisbury; on the 14th at Oxford; on the 26th and 27th at Torquay; on the 29th at Halifax and Stonyhurst; and on the 31st at Liverpool and Stonyhurst.

*Fog prevailed* in October on the 4th and 5th at Bath, Whitechurch, Blackheath, Royal Observatory, and Cambridge; on the 10th at Torquay; on the 23rd at Leeds and Carlisle; on the 24th at Oxford, Royston, Cambridge, Wolverhampton, and Stonyhurst; on the 25th at Bath, Royston, Cambridge, Rugby, Wolverhampton, and Liverpool; on the 29th at Halifax; on the 30th at Whitechurch, Blackheath, Royal Observatory, Oxford, Wolverhampton, and Halifax; and on the 31st at Halifax.

In November on the 1st at Bath; on the 3rd at Carlisle; on the 6th at Blackheath and Royal Observatory; on the 7th at Bath, Whitechurch, and Rugby; on the 8th at Whitechurch, Oxford, and Cambridge; on the 9th at Oxford; on the 14th at Bath, Cambridge, and Wolverhampton; on the 15th at Bath; on the 16th at Royston and Cambridge; on the 17th at Whitechurch; on the 18th at Torquay, Bath, and Whitechurch; on the 21st at Somerleyton; on the 22nd at Truro; on the 23rd at Truro and in the midland counties; on the 24th at Truro, Bath, and in the midland and northern stations; on the 25th at Truro and in the midland counties; on the 26th at Stonyhurst; on the 27th at Stonyhurst and Carlisle; on the 29th at Osborne, Whitechurch, and Oxford; and on the 30th at Truro, Osborne, in the midland counties, and at Leeds.

In December on the 2nd at Wolverhampton; on the 4th at Torquay; on the 12th at Oxford and Royston; on the 14th at Torquay; on the 15th at Oxford, Royston, Somerleyton, Wolverhampton, and Stonyhurst; on the 17th and 18th at Oxford, Wolverhampton, and Leeds; on the 19th at Oxford; on the 20th at Oxford and Leeds; on the 21st, 22nd, 23rd, 24th, and 25th fog prevailed throughout the country, being very dense in and around the suburbs of London; and on the 30th at Somerleyton and Halifax.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

[illegible]

*The highest temperatures of the air* were at Guernsey,  $78^{\circ}\cdot7$ ; at the Royal Observatory,  $68^{\circ}\cdot3$ ; and at Salisbury,  $68^{\circ}\cdot0$ .

The lowest temperatures of the air were at Barnet,  $10^{\circ} \cdot 0$ ; at Rugby,  $11^{\circ} \cdot 0$ ; and at Royston,  $13^{\circ} \cdot 8$ .

The greatest ranges of temperature were at Barnet,  $56^{\circ}\cdot 2$ ; at Royston,  $52^{\circ}\cdot 4$ ; and at Rugby,  $52^{\circ}\cdot 2$ .

The least ranges of temperature were at Torquay,  $35^{\circ}\cdot 1$ ; and at Llandudno and Carlisle,  $39^{\circ}\cdot 2$ .

*The greatest number of days of rain were at Truro, 70; at Nottingham, 68; and at Leeds, 65.*

The least number of days of rain were at Barnstaple, 49; and at Whitchurch and Blackheath, 50.

The greatest falls of rain were at Torquay, 20·47 inches; at Salisbury, 19·01 inches; and at Truro, 18·80 inches.

The least falls of rain were at Lowestoft, 8'11 inches; at Somerleyton, 8'12 inches; and at Blackheath, 8'97 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.		Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Read- ings of the Thermometer in the Month.	Mean of all Lowest Read- ings of the Thermometer in the Month.	Mean Range of Temper- ature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Max- imum in Rays of Sun- in on Grass.	Mean Reading of Min- imum on Grass.	Mean Estimated Strength.	WIND.				Mean Amount of Ozone	Mean Number of Days it fell.	RA.
